why is reflected xss a big vulnerability if its client side?

Money- - August 28, 2026, 3:27 am

Its usually not until you are able to chain it with other exploits to escalate privileges.

It's a big vulnerability to the user without CSP and the 'Secure' and 'HTTP Only' cookie flags set. I'd give you an example of reflected XSS, but the Cloudflare WAF would have a fit.
