Just like their bedroom, this website has so much room for activities. Honestly? It's a Sony Movies film, but aside from the odd product placement of a phone or laptop, I don't recall it being hugely in my face.

Again, this is one of those little feel good movies you can just watch without any care of outcomes. You know the story by now, introduction, chaos, separation, reconciliation, and repeat.

If you've not seen it, it's one I'd suggest watching when you're doing something else, it doesn't require your full attention.

I love this move. I wish they still made things like this today. We need a new 2026 Will Ferrell haha

Great movie that my wife never stops quoting, lol. I've personally never understood the hype behind Will Ferrell. While I don't think he's a shitty actor, I've just never understood why people think he's funny.

Everyone's different I guess!

Probably comes down to he always plays his role, think Gary Oldman, it's not Gary, it's his role. My guess would be same for Will.

One of my all time favorite comedy movies, and a movie that I quote the hell out of to this day. I was just watching another movie with Adam Scott in it and thinking of his character as Derek in Step Brothers.
