Thread: [What exchanges have no fee for debit cards for USDC?](#)

spins - August 31, 2026, 7:02 pm

Coinbase use to offer no fee for using a debit card if buying USDC, now the fee varies from 2-4% .. Robinhood still has no fee but also looking for any others. ?

I don't know of any at all. Exchanges are taxing on debit card top ups and maker/taker fees. You can always check out the Currency Exchange section on HF, and see if someone like myself can help you acquire crypto. My rates vary depending on amount

Robinhood is a horrible platform with fees.

I did an exchange yesterday. I was seeing which website does the lowest fees. OKX, Blockchain and Robinhood. OKX by far the winner. Robinhood took way more fees to sell.

It has no fees to deposit USD with debit card and to buy USDC with it and to withdraw/send it somewhere.
