Thread: [\[FREE\] Fresh HTTP / HTTPS / SOCKS4 / SOCKS5 Proxy List Live Updates](#)

Velvet - September 5, 2026, 8:15 am

? Free Proxy List

Fresh public proxies, continuously checked and revalidated.

-> <https://moleway.com/free-proxy-list>

Wanted to share it with you since it might be useful for anyone who regularly works with public proxies.

You can filter the live list by protocol, country, anonymity, HTTPS support and latency, then instantly COPY, DOWNLOAD, or generate a ready-to-use cURL request based on the active filters.

The LIVE count is shown directly on the website and the proxies are continuously rechecked in the background.

No login, no popups, no forced redirects, and no ads covering the list.

There is also a public API and GitHub mirror if you prefer using it programmatically.

Website:

<https://moleway.com/free-proxy-list>

GitHub:

<https://github.com/Moleway/Free-Proxy-List>

It's completely free. Feedback is welcome, especially if you find something that doesn't behave correctly.
