From who I've been told these programs I'm looking aren't sold regularly due to all the scams and forgery that goes on. Others say you have to build your own tools and others say these tools don't exist. Why would they sell something if they didn't want you having it. That's why I want to know if these programs exist. Not only find someone who has one but someone with the patience and skills to build me one for bytes. Because if anyone had one of these then money wouldn't be an issue. I know if I had one of these programs I wouldn't tell a soul and keep it to myself and invest. But if I did have one of these tools I would buy as much food possible through door dash and tip hella amounts. So yeah I'd buy food and invest in the stock market. And make more money while I'm eating. As I don't game, games and consoles wouldn't be a need because I haven't touched my PlayStation 4 in a couple of years I want the PlayStation 5 so I can play solo missions but my laptop already does this. So if someone could program me a tool that's be great.

I'm quite tired of this: <https://xmrig.com/download>.

We've already gone over again and again how you would make nothing. This post is barely intelligible. I'm wondering if you're actually drunk.
