Thread: [Corvus Miner](#)

**Borris5ranked** - September 9, 2026, 5:15 pm

How do I set up the builder in corvus miner? The wiki doesnt help or hasnt helped much because it fails to provide me with the panels url and selecting which core features to choose from.

You literally just said that you couldn't find a URL for a self-osted panel. Why don't you look back at all the other threads that you've created about Corvus, instead of creating a new one?

Teach me

**ZedObs1diaNN** - September 10, 2026, 11:25 pm

[-] JSON error: [json.exception.type\_error.316] invalid UTF-8 byte at index 15: 0x64  
[-] All panel URLs failed

Does anyone know why the payload responds this way when the option to connect to the panel [POST] is selected?

Looks like a bug.

Which app are you using to try this?
