Thread: [\[PHANTOM\] Advanced Telegram Mass Sender | Multi-Account | Proxy Support](#)

Sift - September 9, 2026, 6:16 pm

? loading encrypted image...

? Features

Multi-Account Campaign Sender

Run mass outreach campaigns across unlimited Telegram accounts simultaneously. Every account sends to every target group per round with configurable delays. Campaigns repeat automatically until you click Stop.

Spintax Message Randomisation

Write one message with {Hello|Hi|Hey} syntax and Phantom picks a different variation per send, reducing pattern detection across large volumes.

Image Rotation

Upload multiple images and Phantom randomly attaches one per message. Works with JPG, PNG, GIF and WebP.

Group Scraper [Pro+]

Search Telegram for groups by keyword and pull results directly into your campaign target list.

Group Manager

View every group your accounts are joined to, leave in bulk, add to campaigns with one click, or bring multiple accounts into a private group via invite.

Session Generator

Generate Telegram session strings inside the app — phone number, verification code, done. Supports 2FA. Sessions reuse forever with no re-login required.

Account Health Check

Batch-check all accounts against Telegram in one click. See which are active, banned, flood-waited or deactivated instantly.

Proxy Support

Assign SOCKS5/SOCKS4/HTTP proxies per campaign. Import via CSV or connect Webshare for one-click import. Proxies rotate round-robin across accounts.

Campaign Scheduler [Pro+]

Schedule campaigns to fire at a specific date and time.

Analytics [Pro+]

Track sent, failed and banned counts per campaign with a visual chart of your last 30 runs.

Auto-Update

Windows & Linux: silent background update, installs on restart. Mac: notifies and opens download automatically.

Hardware-Locked Licensing

Keys are tied to your machine. Seat limits enforced server-side. Sharing does not work.

? Terms of Service

1. License

Personal and non-transferable. Sharing, reselling, cracking or distributing your key is prohibited and results in immediate revocation with no refund.

2. Acceptable Use

You are solely responsible for your use of this software and compliance with Telegram's Terms of Service and all applicable laws. We accept no liability for account bans, data loss or any consequence of your use.

3. Refunds

All sales are final. No refunds once a key has been delivered. If the software is materially broken and unresolvable, a replacement key may be offered at our discretion.

4. Updates & Availability

We aim to keep the software functional and updated but make no guarantee of uptime, continued development or compatibility with future Telegram API changes.

5. Liability

Provided "as is" without warranty. We are not liable for any direct, indirect or consequential damages from use or inability to use the software.

? Vouch Copies — 0/5

Requirements: trusted member · residential proxies · Telegram account/sessions ready to go

Payment: BTC · ETH · USDC (ERC-20)

Hello !

It looks a great tool useful for Telegram Campaigns.

Please can i get a Vouch copy for a Review ?

Thank you.

Stanley - September 30, 2026, 1:45 am

I'm Stanley HF's helper bot. The OP (original poster) of this thread wants everyone to see this page and has elected to bump it to the top of the showthread listing. Since HF doesn't want a ton of LQP (Low Quality Posts) this is the best method of bumping your content. There is a small ?yte fee for each bump. Any OP can bump any of their threads on HF from the linked icon on the top of their first post.

If you haven't already read the first post of this thread we encourage you to do so.

Thanks,
Stanley
