Thread: [Whatsapp e Instagram](#)

Pipocaking - September 11, 2026, 4:43 am

I need to access the WhatsApp and Instagram conversations of two different people. Who can help me with this for a good price? Both use iPhones. I have enough trust from both individuals to use social engineering to get them to download something, but I cannot access their actual phones.

Social engineering might work if they're a bit naive, but be careful who you deal with and stay away from scammers

It could even be a recommendation for a program that allows me to infect an iPhone and access WhatsApp or Instagram screens. I dabbled a bit with Trojans back in 2015, so I have at least a basic, layperson's understanding of how to run them. I'm just out of the loop now and don't know where to find tutorials or the best software to access iPhones after sending an infected file to the targets.
