Thread: [Any one offering telegram spam/bomb service?](#)

LethalNET - September 11, 2026, 9:41 pm

Price is no object, payment in crypto, need a group to be bot bombed and users to be spammed from multiple / hundreds of accounts , I created my own telegram bot in python using telethon and a image to text plugin to grab text etc but i dont have account lists, i feel this would be easier to either pay for upfront [a pre made bot + user list] or to pay for the service, got crypto ready to spend, DM me or post here if you can help with this
[contract=tid]Start Contract[/contract]

You should talk to [Sift](#) and checkout his thread.

Then move to someone who sells bulk accounts.

valsewrowsonick - September 13, 2026, 3:06 pm

I have a script available for sending spam messages, as well as session-based accounts ready for use; I can sell them to you in bulk.

I send bulk spam messages via Telegram, and there is a way to purchase accounts cheaply—in the form of sessions—to use for sending spam.
