MALWARE HUNTER

ALL-IN-ONE MALWARE ANALYSIS WORKSTATION

????????????????????????????????????

A dedicated workstation for malware analysis, reverse engineering, threat research and suspicious file investigation.

????????????????????????????????????

WHAT IS MALWARE HUNTER?

Malware Hunter is designed to bring the main parts of a malware investigation into one focused workspace.

Instead of constantly switching between different tools, the goal is to provide a practical environment for investigating suspicious Windows files and binaries.

Built for researchers who want more than a simple "malicious / clean" result and need a workflow for deeper investigation.

????????????????????????????????????

FEATURES

STATIC ANALYSIS

Inspect suspicious files and examine metadata, strings, file information and other indicators useful during an initial investigation.

DYNAMIC ANALYSIS

Investigate sample behavior during execution and examine process, file system and network-related activity.

REVERSE ENGINEERING

A workflow focused on deeper binary investigation and reverse engineering rather than relying only on basic detection results.

MALWARE RESEARCH

Analyze suspicious samples, investigate their behavior and organize important findings during research.

ANALYSIS WORKSPACE

Keep different stages of an investigation organized inside one dedicated analysis environment.

????????????????????????????????

WHO IS IT FOR?

- Malware Researchers
- Reverse Engineers
- Security Researchers
- SOC / Security Analysts
- Threat Researchers
- Cybersecurity Students
- Windows Binary Analysts
- Security Enthusiasts

????????????????????????????????

PRICING

\$19 — 1 MONTH

Short-term license

\$49 — 3 MONTHS

Extended license

\$199 — 1 YEAR

Long-term license

No free plan.

The only difference between the packages is the license duration.

????????????????????????????????

WHY MALWARE HUNTER?

The project was built with one main goal: keeping malware investigation focused and organized.

Rather than adding a huge number of unnecessary features, Malware Hunter focuses on the analysis workflow itself.

The project is actively being developed and feedback from people working with malware analysis and reverse engineering is welcome.

????????????????????????????????

INTERESTED?

Want more information about the workstation, features or licensing?

Reply to this thread or send me a private message.

I'm happy to answer questions and provide additional information about Malware Hunter.

????????????????????????????????

MALWARE HUNTER

Malware Analysis • Reverse Engineering • Threat Research

Not being rude but the way this is drafted looks like AI generated your thread?

some text is unreadable.
