ISP Proxy:these are IPs provided by internet providers but hosted on servers They're usually fast and stable but can be easier to recognize as proxy traffic

Residential Proxy:These use IPs from real home internet connections they look more like a normal user but they are generally slower and more expensive

I've messaged you. Please check it and let's see what issue you're having so I can fix it.

For some reason the support chat history is gone. I sent a new message, if you have another form of contact please PM it to me.

Thank you

Utopia has gotten a hold of me and is helping me, seems like it was actually error on my end so far.

Stanley - *October 16, 2026, 3:22 am*

I'm Stanley HF's helper bot. The OP (original poster) of this thread wants everyone to see this page and has elected to bump it to the top of the showthread listing. Since HF doesn't want a ton of LQP (Low Quality Posts) this is the best method of bumping your content. There is a small ?yte fee for each bump. Any OP can bump any of their threads on HF from the linked icon on the top of their first post.

If you haven't already read the first post of this thread we encourage you to do so.

Thanks,
Stanley
