I really hope I can learn a lot here on this forum it looks like a great community so far from what I've seen a lot of times when you're dealing with hackers they will give you information that will effectively screw you in the end.

I'm a beginner and I just need to find a good community where I'm not going to get screwed. ?

I came here to learn too and there's lots of great resources. Save some of your bytes for purchases and try to contribute where you can... Nice to meet you

Just looking to see if I can mess around with my old phones and see if there are any good money making strategies.
