Did you open a contract with them?

CL1B - September 25, 2026, 2:40 am

DramaKing is one of the oldest most persistent skids on here, can't imagine you went trough with his services.

Given the low amount he will probably send the money back, but I genuinely think members like these should be prohibited from offering these kinds of services. They rely on unknowing often new to the scene like members and contact them directly making it hard for these people to get a sense of who the member really is; If only you took 5 minutes to read DramaKings posts on HF you would've realized this is bad business.

It should be stated that DramaKing is not capable and if anything unreliable for cybersec practices, especially in the sense of security, coding and reliability.

Next time take the time to gather different options, in this case; different members that could've help you host your instance and develop a dropper. And if anything, use a middleman.

lol this post made me check closer and you are right, its so obvious he can't code ^^ in one thread offering web exploitation services, in next asking for help to understand how basic wordpress

/wp-admin/ RCE's work thinking its cPanel based lol...

then again offering "Unique Methods" thread, and after that complaining he does not know how to configure simple apache web-server routing with SSL/Domain ^^

but then again at least he is not overcharging for his github.com scripts & hexstrike-ai based web-exploitation, so he also must be the most honest skids here!

@laicaroberto1 i think you actually got lucky to not lose 10x that, and learnt a lesson on top of that!

I refused the refund because @laicaroberto1@/Valuteitalia claimed made-up issues and refused to negotiate in good faith.

Who are you again? At least I've only had one account.

My tools are simple, but they work. I don't offer any web exploitation services, though I do occasionally get asked. What thread asks about basic WordPress RCEs?

You named two two things that are unrelated, and I can't think of any time that I complained about knowing Apache webserver routing. Virtualmin was a problem, yes. Can't even find a "Unique Methods" thread.

frist of all i have asked to install overlord in my server and result was ban my server with 6 month prepaid

second he installed it on his own server and this happend

? loading encrypted image...

i told him to do not worry and take your time to rebuild and fix everything

third thing that panel have other victims not mine

? loading encrypted image...

so its all fucked up and only confusion

four- the dropper he gave to me is not working and i can give it to admin to verify himself

? loading encrypted image...

after waiting days i asked for refund

? loading encrypted image...

and he just egnoring me and not giving me refund

the dropper till this moment do not work with me and have tryed it on numerous machines

i dont want it anymore please refund me the money and u can take the frist 10\$ for rat setup its simple

DramaKing - September 25, 2026, 8:08 am

See, people? OP adamantly asserts his own view of events. Refuses to acknowledge that the file works.

Funny how how he claims to use it on "numerous" machines, but it's worked every time that I've tried it.

Oh, and I've never once used Hexstrike for anything but my own use.

laicaroberto1 - September 25, 2026, 5:18 pm

upload the file and anyone can examine it ? please do it , this unique install maybe you did it with direct payload , there is no proof its the dropper , we are not stupid as u think .

you are coward doing this stories and lies over 26\$, i do not really care about the money but its a good ocasion to reveal who you are .

I'm not lying here. Anyone can ask me for the file (or you), but they won't.

Boobarina - September 25, 2026, 6:30 pm

Yep sounds like a scam indeed

Binance - September 25, 2026, 6:31 pm

no offense, who the hell risks jail time for \$26

I won't be the one going to jail. Ask the person risking jail time for nothing.

Yes, my friend, he isn't actually good at anything; he simply used artificial intelligence to do it, and
the quality was poor.

Says someone who would know about using artificial intelligence without disclosing it but not about
anything that I've ever sold. You've only been a member for a week; you're just mad about being
called out. I'll put my skills against yours any day.

So far I only see OP claiming that this is not working. I'd be hard pressed to believe that DK would
fail to configure Overlord and an exploit. I would hope that more context would be necessary for
such a goofy dispute.

No exploit, just a tweaked open-source loader. To be fair, there was a bug that I didn't know about,
but I fixed it. Screenshot clearly shows it working.

Charlie Sheen - September 26, 2026, 8:49 pm

I got on a call with DramaKing and had him show me everything working. He is willing to assist you
in resolving whatever technical difficulty you are facing on your end. This dispute however is invalid.

laicaroberto1 - September 26, 2026, 9:08 pm

the file now and after 10 days still not working , i need refund
