Thread: [How do I use Tor to VPN](#)

its1988andwearefree - September 25, 2026, 6:36 am

To be clear, I'm not asking for "Connecting to VPN and then connecting to the guard node."

I'm asking for "Connecting to Tor and then afterward connecting to a VPN from the exit node."

Shellc0de™ - September 25, 2026, 7:18 am

Just use Whonix Gateway, it will act as a bridge and route all traffic through ToR Network, and you can have any additional VPN connection on either side.

You can't. A VPN won't connect over a proxy. You would need a VPN with Tor servers.

?

A simpler option is to use Tails, but Whonix is way more locked down and secure.

Look, since we're already poking at the subject... I cooked up a little vpn to tunnel everything through Tor. If there's enough interest for it i might just open source it.

Looks very nice interesting and the GUI looks awesome. Hopefully i can get to use it whenever you

release it. Best of luck.
