Thread: [Kyc Services - Open Ups](#)

Oxycodone - September 26, 2026, 8:14 pm

Our team has been working on improving current KYC verification methods to help create accounts across a variety of services.

We have a few methods that have shown great success during our testing.

We are barely venturing into this market, and with that said,

we are not charging full upfront costs, as these will be made on demand later. We will be focusing on aging accounts properly.

Price for the open-up upon success will be determined beforehand. We have opened accounts for sites we have tested on but want to see how our methods work against sites the community needs these services for.

Once we have compiled a larger list of sites commonly asked for, we will be setting steady pricing and will have accounts made prior to order.

Currently, accounts will be made at the time of order, so processing can take 1 to 7 days. The reason why is due to the needed method to bypass the KYC. We will attempt it in a variety of ways. Worst case, most situations shouldn't require too long if there is no wait time for approval. This will be communicated throughout the process.

For those who need multiple accounts or bulk accounts made: we cannot guarantee an infinite amount of accounts for any site. We can verify our methods work, estimate the time it would take to process your order, and give you an estimated time and cost broken down per account and what that equals to once all accounts are created.

We are looking for reoccurring clients for the same services, preferably.

Due to the service being new and us hoping to start off strong, contracts will only be initiated at time of handover. Before contracts are created, we will need to have the account ready to hand over, and pricing will be discussed prior to starting.

PM me with the services youre looking for. We will notify you if we have any problems or require additional information to help. If you are aware of anything we should know prior to starting please let us know to help further speed things up if you believe the site being requested has something in the process we should know about.

This thread is a sales thread but we are currently aging our inventory and looking to see what sites are worth investing our time into to help have a better idea of what the customers really need.

We will be changing this thread once we have our inventory In order and have additional sites added to it and have some aged.

If there is further verifications needed such as any deposits or transfers to occur. This will be

communicated and is your responsibility for sites we are working on and dont already have completed.

Thank you.

Message me details to begin and we will notify you with details or questions and when we are ready to begin a contract at time of delivery. If account is no longer needed at time of delivery. We will simply add it to our inventory and you will forfeit the ability for first come first serve to our service for that site incase another client does purchase it we cannot hold onto these accounts for you.

by chance, do you guys have a method to bypass pornhub KYC verification?

J1000 - *October 13, 2026, 9:31 am*

are you selling like on a site ore just like here
