User also openingly jokes about abusing children in the convo.

Something is not right in his head.

He also was - popped for making jokes about different type of child abuse..

Also seems like all his replies to everything is just ai generated.

As can be seen here I called him out about joking about child abuse and he replied to the question with some ai nonsense ending up in him claiming I scammed him for 150\$ which is completely out of the context of previous messages in the convo.

That user behaves differently depending on the person it's talking to.

His llm is quite nice to me.. when I first met him I got a random neg pop saying plays too much games, I messaged and was like what are you on about he was being rude until it changed because I was being nice..

Asked him about reverse engineering later in time, and he said go into terminal type this and give me your IP... I will be your mentor..

Thought to myself... He thinks I'm dumb.

Admit it, y'all miss my presence and convo isn't the same with my sense of humor. Plus what am I to do with all of these bytes if not flip? Charles, I expect a full pardon by midday cause if I miss another rain [7](#) is getting downgraded to 5 and 3 quarters.

Give them to me, I'll flip on your behalf.

Put a lego on a stick, your out of tech pussay. Honestly I've grown fond to cherish each of y'all (Excpet [Sift](#) who that bitch trynna claim - I'm taken already) and would've loved to continue speaking further in behalf of those who donnot have a voice of their own.

And also, ROFLMAO thinking ChatGPT Astra could ever climb mountain Everest then have a freefall headdive down to get to my level. Sam please, upgrade your codeine standards because this crackjob is out of a job, and all outta crax. ??

You're not qualified for anything, much less being part of Konoha and battling frogs.

Don't make a full timeline of our conversations here in public. Have some decency or idk, send a message talking about how the chat dried up without 66686

I'm sorry you feel this way, but I would still like your bytes. Please and thank you.

There used to be someone really there. And then it switched to that other persona.

Sadly Borderline hasn't returned yet the LLM still looming on his profile.
