Thread: [Brute Force Metamask/Phantom/Atomic/Electrum/Trust](#)

9tiraprimo - September 28, 2026, 1:46 pm

Password recovery / Brute Force for wallets such as MetaMask, Phantom, Exodus, Atomic, Unisat, Wallet.dat, Keplr, Wasabi Wallet, Electrum, Ronin, UTC (MyEtherWallet), Coinomi, Coinbase, Rabby, MagicEden, TronLink, Trust Wallet, Sui Wallet, ArgentX, SafePal, and OKX (if the required wallet isn't on the list, we can quickly write a module for it);

60/40 revenue split in your favor.

Our advantages:

- Maximum speed. We operate 24/7, stay in constant contact, and begin processing your logs without delay.
- High efficiency: In addition to manual work, we utilize a powerful, proprietary AI model as an auxiliary tool. Trained on over 2,000,000 logs, it accelerates the process and improves cracking accuracy.

We use two self-managed clusters for cracking operations: 180x5090 and 100x4090.

- Extensive experience: We have been extracting cryptocurrency from logs for years.

We accept logs even after they have been processed by other brute-forcers.
