Thread: [Multi-Chain Crypto Drainer Source Code | BTC/SOL/ETH/TRX/BNB | 530+ Wallets](#)

hiskill - September 30, 2026, 10:11 am

? Drainer – Multi-Chain Crypto Drain Tool (Open Source) ?

Free Demo Available – Try the phishing pages yourself, test the drainer in real time, and check out the Telegram bot and admin panel before buying.

Looking for a clean, efficient drainer with broad compatibility? This is a full-stack solution with realistic phishing pages, backend logic, and a Telegram control panel.

Key Features

? 2 Ready-Made Templates – Exact Coinbase-style replicas + a dedicated exchange phishing page.

? Works on 500+ Wallets – Supports almost every major wallet.

? 300+ Blockchains – Universal contracts for the entire EVM ecosystem.

? Permit2 Support (Ethereum & BNB) – Drains up to 30 ERC-20 tokens with zero gas for victims.

? Direct Transfer Mode – Available on Ethereum, BNB, TRON, and more.

? TRON Mode – Uses a stable USDT approve method (Permit2 is avoided due to compatibility issues).

? Solana Support – Two drain modes:

- Mode 1: Direct SOL transfers
- Mode 2: Simultaneous draining of all tokens + SOL via approve

? Bitcoin Support – Direct transaction draining (no approve needed)

? Mobile-Friendly – Optimized for Trust Wallet, MetaMask Mobile, and others.

? Manual Drainer with Delay – Customizable execution timing

Telegram Bot & Admin Panel

? Private Telegram Bot – Simple, clean interface.

? Russian & English Support – No language barriers.

? Unlimited phishing endpoints – Generate as many as you need.

? Admin Management – Add or remove team members.

? Drain Mode Selection – Choose between Permit2, Approve, Direct Transfer, or Bitcoin direct transaction.

? Real-Time Stats – Track everything with notifications.

? Centralized Control – Manage everything from one place.

Why This Stands Out

? Modular Code – Easy to add new features or networks.

? Detailed Logging – Helps with debugging.

? Clean & Maintainable – No messy, obfuscated code.

What's Included?

? Full Source Code (Frontend + Backend + Bot + Smart Contracts)

? Deployment Guide + Personal help with setup

? Docker Compose Setup – Easy deployment

? 30+ Language Support – For global reach

? Free Demo – Test everything before buying

? Customization Available (extra fee)

? Escrow Protection – Safe transaction

? Work through Escrow only — your safety is guaranteed

? Honest Note from the Developer

Many sellers claim "undetectable bypasses with zero warnings" – but that's misleading.

No bypass is 100% invisible.

Over-obfuscation often makes things worse.

This tool minimizes warnings (~70% of cases) through smart optimization, not tricks.

Price: \$370 — one-time payment for full source code.

No monthly fees. No hidden commissions. Full ownership.

If you're tired of overpriced kits with empty promises — welcome to Drainer.

Ready for a free demo? DM for a demo.

1 credibility? If you have this tool wouldn't you make more from draining rather than just selling it?

Can only mean 1 thing- scam

Why on earth are you calling this a scam when you don't know anything and haven't seen anything? You're just some random person off the street who doesn't know a thing.
