iCore Protection:

Monitoring clipboard every 300ms

Scans all visible UI elements on screen every 1.5 seconds - catches addresses before they're even copied

Auto-reloads wallet config every 2 seconds when changed - no restart needed after saving

??Multi-Coin support

BTC, ETH, BNB, USDT (ERC20 / TRC20 / BEP20), USDC, XRP, TRX, SOL, MATIC, AVAX, LTC, DOGE, ADA, TON, XLM, ATOM, XMR, DOT, ICP

?Server & Multi-User

Automatically deploys to every active RDP session on the server every 20 seconds

New sessions that connect later get covered automatically

One instance per session — no duplicates

???Service

Runs as a Windows service — starts automatically on every reboot

Configured to restart itself on failure

Survives user logouts and reconnects

Setup

Dedicated setup panel to configure one correct address per coin

Config stored in %ProgramData%\Asgaurdian\wallets.ini — shared across all sessions

Change addresses anytime — all sessions pick it up within 2 seconds

Price:

Lifetime only : 150\$
