Thread: [Custom Animated Explainer/Product Videos - \\$150 intro price](#)

Hey everyone,

I run a small studio doing brand design and video work. Opening up a few slots for custom animated explainer videos — the kind SaaS/product companies use to show off a feature, announce funding, or explain what they do in under 30 seconds.

What's included:

15-20 second animated video, custom illustration or Logo Usage (not generic stock templates)
Logo/brand intro and outro
One round of revisions

Sample of the style (illustrated character + UI mockup, this one was for an AI productivity tool):

Intro price: \$150 USD (limited slots). 50% upfront, balance on delivery. Payment via BTC/USDC/USDT

Good fit for: funded startups, SaaS products, app launches, or anyone who wants a short video for their landing page, LinkedIn, or investor updates instead of a static screenshot deck.

If interested, drop a reply or DM me here. Happy to share more samples or do a quick call first.

Thanks,
