Is this just Open Router relay or can they use tools as uncensored?

DramaKing - October 6, 2026, 1:50 pm

I would be surprised if Fable was more than 0% uncensored.

SIM-2470866 - October 6, 2026, 6:53 pm

I hardly doubt the list of uncensored is accurate.

OP you have any llmtest results? Share them if you have. I'm interested

(pretty sure some chinese guy would be going through my chat)

His English isn't good, but I don't think he meant to actually imply all of the models on there are uncensored.

GLM 5.3 Uncensored would be to an extent, and then Abliterated is supposed be actually uncensored.

He can feel free to correct me, but I wouldn't expect the other models to be any different than from the actual providers, if these models are what they say they are.

In all honesty, when you're using a 3rd-party provider, you should treat it with more care than you would your own account on the official platforms. Unless the provider gives you the go-ahead. I'm interested, if not just to run cctest

Will test this

Fable 5 at .90/.90? Why do I find this hard to believe?

samgabes - October 7, 2026, 10:30 pm

Are these even real models

(Oct 7, 2026 03:24 PM)Paimon Wrote: [\[CITE\]](#) Fable 5 at .90/.90? Why do I find this hard to believe? It isn't too difficult to get started. Subscription accounts are like 77x (Pro sub) or more value over API. "All you have to do" is find a way to use software like sub2api. The difficult part is not getting the accounts banned because everyone else is trying to do it and you're going to have users that perform distillation attacks or try to redteam despite knowing better.

77x is a 98.7% discount, but there's a reason why these providers never seem to last.

The offering isn't unbelievable but the pricing disconnect for cache-reads and grammar/post formatting and warning make it a bit odd.

Model News :

Added GLM 5.3 Abliterated, one of the smartest fully abliterated models at \$1.4/M and \$0.4/M cache.

This is for those who need the smartest 100% uncensored model, the rest can use GLM 5.3 Uncensored which is much cheaper and ~90% uncensored.

I'm Stanley HF's helper bot. The OP (original poster) of this thread wants everyone to see this page and has elected to bump it to the top of the showthread listing. Since HF doesn't want a ton of LQP (Low Quality Posts) this is the best method of bumping your content. There is a small ?yte fee for each bump. Any OP can bump any of their threads on HF from the linked icon on the top of their first post.

If you haven't already read the first post of this thread we encourage you to do so.

Thanks,
Stanley
