Thread: [\[.BAT/.HTA\] Julia Crypter | GUARANTEED BYPASS | .NET & Native](#)

juliatools - October 6, 2026, 5:12 pm

JuliaCrypter

Julia is a new and affordable crypter written from the ground up for all of your needs.
Payload output is BAT with an optional BAT to HTA converter.

Features

- Undetected on 71/71 engines scantime on Virustotal
- Undetected on 25/26 engines on EuroScan
- Supports .NET64, .NET86 and X64 exe files (X86 native is not supported at the moment)
- Custom PIC written in C/ASM that loads your payload stealthily
- Smart App Control Bypass
- Two different stubs provided (BatchJScript and BatchPythonSAC)
 - | BatchJScript = Batch->JScript->Powershell->PIC->Your payload
 - | BatchPythonSAC = Batch->Python Download->Python->PIC->Your payload
- Tiny file sizes (50kb-100kb) thanks to the usage of steganographic image hosting
- Uninstall script for removing persistence and cleaning up traces.
- Purchasing with XMR and crypting directly from the telegram bot.

Build Options

- Anti Debug
- Anti Virtual Machine
- Blacklist CIS Countries

Prices

- One Day \$49.99 - One Month \$249.99 - Three Months \$649.99

How does your Smart App Control Bypass work?

juliatools - October 7, 2026, 7:34 pm

(Oct 7, 2026 06:48 PM)elghub Wrote: [\[CITE\]](#) How does your Smart App Control Bypass work?

The stub that bypasses smart app control executes the payload through a signed python binary.

ghoostmood - October 7, 2026, 11:04 pm

does it support and work on both 32bit n 64bit

loaderthero - October 9, 2026, 11:38 am

Please add LNK

For .NET it supports both 32 bit and 64 bit
For native it only supports 64 bit
