Thread: [Useful Wireshark Filters](#)

FatCat - *October 6, 2026, 7:36 pm*

Some Wireshark filters I find useful:

dns
http
tcp
udp
ip.addr == 192.168.1.10
tcp.port == 443
dns.qry.name

These are useful when learning network analysis
and troubleshooting lab traffic.

What Wireshark filter do you use the most?
