Thread: [Animes like Solo Leveling](#)

I got back into anime recently and I'm afraid to say Solo Leveling just became my new favorite anime after Tokyo Ghoul. Does anyone know more animes like it? I've been watching "Spare me great lord" but it doesn't hit the same.

One way I used to find similar anime was to just use MyAnimeList. They have a recommendations section and I would just go down the list and see if they seemed worth the watch.

Power fantasy anime?

Only one that comes to mind aside from that is Ragna Crimson. There was also some Chinese ones, but forgot their names. Really good animations on those though.

If you liked Solo Leveling, you definitely need to watch Hunter x Hunter. Completely different vibe, but the character development, power system, and fights are absolutely top-tier. Give it a shot, I think you won't regret it.
