I have upgrade FA to version 6.1.1 Pro. It's not the latest version, which is 7, but it is the last version of Pro that I paid for.

If you see any bugs on page with icons, please LMK asap. There could be compatibility issues.

I am also contemplating a mycode plugin for FA inserting.

Hell yeah! Nice update.

I'd love to see a way to use icons in posts!

Thanks for your hard work Omni, have you planned to do more visual upgrades in terms of UI ? If so what kind of change are you planning ? Specifically talking about profile page changes, awards, new upgrades. Either way, thank you once again!

Yes, I want some changes to UIX. At this moment I don't want to start listing it off.
