Thread: [\[500k Labels\] OnChain Blockchain Tracking Software.](#)

Topia - October 11, 2026, 2:26 am

? OnChain — Advanced Multi-Chain Crypto Tracker & Fund Intelligence SaaS ?
Powered by Binary WebSockets | 500,000+ Curated Labels Database

??

OVERVIEW

OnChain is a high-performance crypto tracking and forensic CTaaS, Crypto Tracking As A Service (yes i just invented a new SaaS XD) built for deep fund analysis, risk monitoring, and real-time tracking. Built from scratch for speed, it runs on an ultra-fast binary WebSocket engine to handle massive data feeds instantly without lag.

Currently supports Bitcoin, EVM chains, and Solana, packed with a massive database of over 500k+ custom labels (exploits, exchanges, high-risk wallets, etc.).

??

FEATURE SHOWCASE

Check out the video overview below to see the platform in action:

? <https://vimeo.com/1234772958> ?

[Note: The UI in the video is currently in French, but full English localization is dropping very soon!]

??

FEATURES

- Dashboard & Live Alerts: Real-time portfolio tracking, native/token balances, and live security/risk feeds streamed instantly via WebSockets.
- Address Lookup: Deep inspection for BTC, EVM, and SOL wallets. Instant breakdown of holdings, transaction history, and associated risk flags.
- Transaction Lookup: Granular tx breakdown covering block positions, gas metrics, execution status, inputs/outputs, and raw event logs.
- Threat Intelligence Database: Curated list of malicious contracts, exploits, and flagged entities with tags and risk ratings.
- On-Chain Flux (Flow Graph): Visual graph explorer mapping fund movements (In/Out, multi-hop, exchange hops) with node clustering and auto-tagging.
- Smart Contract Inspector: In-depth contract analysis detecting proxy patterns, selectors, opcodes, standards, and decompiled logic.

??

ACCESS & TESTING

NOTE: This thread is strictly a feature showcase / preview. There are no prices listed here.

If you want to get access, test the platform, or request a trial:
