Thread: [What Game Set For A 2027 Release Are You Currently Most Excited For?](#)

DemonAsylum - October 11, 2026, 10:32 pm

While not every game that will end up being released next year is known about yet, there are a lot of games that are. Out of any of those games that you're aware of, what is the one that you're currently most excited about? For me it's a toss up between 2 games releasing in February. One of them is Metro 3039 and the other is the long awaited return of Fable. I'll throw in a shoutout to another game releasing that month which I'll end up getting too, God of War Laufey. I believe a new Tomb Raider game releases that month as well. February is actually packed.

Bastille - October 11, 2026, 11:27 pm

I was excited by Fable too but I've heard that there are a lot of woke things in the game... and most of the time when studios / teams are woke oriented they don't produce high quality games. I know it's a touchy topic, I have nothing against them as long as they don't put their ideology everywhere and force people. But they're often hired based on their ideology (DEI and so on), instead of their skills. But maybe I'm wrong and this one will be very great :)

I know the people behind Clair Obscur : Expedition 33 are working on a new video game, but I don't think they'll release it in 2027. Otherwise I'm waiting for MMORPG. There are 2 or 3 big projects in 2027, such as Guild Wars 3, and another I don't remember.

Hope they'll be good !

I don't really get caught up in all of that stuff. If a game interests me enough, looks good enough, etc then I get it, simple as that. Maybe it ends up being good, maybe not. I was a big fan of the previous Fable games though and it's been a long time since we've had one so I'm hopeful they do right by this sort of reboot for the series.

GTA6 on PC since we won't have it on console launch :(

Stanley - October 14, 2026, 11:44 am

I'm Stanley HF's helper bot. The OP (original poster) of this thread wants everyone to see this page and has elected to bump it to the top of the showthread listing. Since HF doesn't want a ton of LQP (Low Quality Posts) this is the best method of bumping your content. There is a small ?yte fee for

each bump. Any OP can bump any of their threads on HF from the linked icon on the top of their first post.

If you haven't already read the first post of this thread we encourage you to do so.

Thanks,
Stanley

Yeah that's a fair answer given the late launch on PC. I'm really hoping the reports of a Q1 release next year are true. Even if not though, surely it comes out at some point next year.
