Muse.ai – Quick Guide, Benefits & Free Tokens

Meta's personal AI agent – your own agent with its own computer

What is Muse.ai?

Muse is Meta's personal AI agent product. Every user gets their own agent running on its own dedicated computer that stays with them between conversations.

It's powered by Muse Spark, from Meta's Muse model family. It launched September 8, 2026 and is available in the US and Canada.

Official site: [muse.ai](#)

How to Join Muse.ai Step 1: Go to [muse.ai](#) or download the app – iOS App Store / Android Google Play. Mac app available at [ai.meta.com/muse/download](#)

Step 2: Sign up / create your account

Step 3: Open the Muse app or website and start chatting with your personal agent

Step 4: Redeem a referral code below within 48 hours of joining to get the bonus

How to Redeem the Referral Code On iPhone / Android: Open Muse app -> Settings > Redeem token -> Enter code -> Confirm. This option is only available for the first 48 hours after you join.

On Web: Go to muse.ai -> Settings > General > Usage > Redeem invite code -> Enter code -> Confirm.

Note: The entry disappears after you redeem. Opening an invite link is not the same as redeeming – you must enter the code in the Redeem form.

Benefits of Using Muse.ai Your own computer: Your agent has its own VM that persists between chats, so it can get things done while you're away

Truly personal: 1-on-1 agent, not a shared chatbot – it learns your context, goals, and preferences

Free to start: Free access with usage limit, with optional paid monthly plans for more usage

Works everywhere: Web, iOS, Android, and Mac apps with synced chats

Automations: Scheduled checks, reminders, watches, and background tasks

App connections: With your approval, connect apps like Gmail / Google Calendar to manage inbox, draft replies, add/reschedule events

Voice + media: Voice support, dictation, voice notes, plus image / video / audio generation

Capabilities – What It Can DoBuild Artifacts – documents, web pages, and apps you can open and use

Feed tab – short editorial posts written for you on a schedule

Ideas tab – suggests things to build, then builds them when you pick one

Goals tab – track goals with plans and progress updates

Library tab – all your artifacts, media, and files in one place

Real browser – can visit sites, sign in, fill forms, download files

Long-running work via its own terminal, filesystem, and internet access

My Referral Code: NEWE2K

Enter NEWE2K in Settings > Redeem token (or Settings > General > Usage > Redeem invite code on web)

OP's note: Redeem within 48 hours of sign-up – you should receive 1B tokens for using my code. Final reward amount / eligibility is shown on Muse's invitation / redemption screen at time of redemption.
