Thread: [NEW WAY TO DRAIN CRYPTO | BOOKMARK drag and drop method! NEW!](#)

fff41fff - October 12, 2026, 11:51 am

Hey everyone, I'm offering a custom bookmark crypto drainer. It stayed private for a whole year until our discord group got leaked iykyk

MACOS / WINDOWS / LINUX

Supports All browsers known to a man

No wallet connect

No seed phrase

No software install

No extensions

100% stealth

Not patched

Nothing feels obviously malicious, just a "helper tool" running inside your bookmarks (yeah, bookmarks!)

It was private until 4 days ago! non of your victims will know about it, it's that fresh!

Its being used like this:

- 1) scammer dm you
- 2) they tell you to save a preconfigured legit looking website as a bookmark
- 3) you open photon/gmgn/fomo or another service and click on the bookmark you just saved
- 4) script runs directly inside your active session and can drain tokens from the connected wallet to it. Or we can configure it to wait until funds are available to drain everything at once, not just small craps!

Development and deployment takes 24-48 hours and it can be customised for your needs/websites and etc.

I will attach few videos and pictures showing what to expect.

Before anything else, you'll need to tell me which websites you're aiming for, and then I'll create a script tailored specifically to your use case.

It doesn't have to be limited to photon gmgn and fomo — it can be anything. Take Opensea for NFTs, for example, or some little-known site where victims usually link their wallets.

Our script records the data that gets exchanged between the website and the wallet connected to it.

escrow only

Ion have time if you changed your mind last minute

1/3 spots left

500 USDT if you wanna target any website/target/service

300 USDT if you wanna target FOMO, GMGN and PHOTON

All deals will be made thru escrow

I'm Stanley HF's helper bot. The OP (original poster) of this thread wants everyone to see this page and has elected to bump it to the top of the showthread listing. Since HF doesn't want a ton of LQP (Low Quality Posts) this is the best method of bumping your content. There is a small ?yte fee for each bump. Any OP can bump any of their threads on HF from the linked icon on the top of their first post.

If you haven't already read the first post of this thread we encourage you to do so.

Thanks,
Stanley
