Thread: [People without headaches](#)

I heard that there are some people in the world that have never had headaches or stomach aches ever in their lives.

Is this a true fact and what could cause them to never have these brutal issues?

My grandpa used to say he has never had a headache. I get them frequently. I have tried to cut back on everything that seems to be causing me headaches. Which helps a bit, however I can't give up caffeine. It's too difficult, the caffeine withdrawal headaches are a nightmare. Currently fighting one right now as I only had 1 alani today and I normally have 2.
