Thread: [Custom Infrastructure & Data Exfiltration Solutions](#)

infostealer - October 12, 2026, 8:09 pm

Most tools bought and sold these days are easily flagged and detected, my engineering is the difference between EDR flags and successful exfiltration. I specialize in developing low-level, fully undetected infrastructure tailored for precision operations.

With over 13 years of experience in systems architecture and malware development, I deliver end-to-end solutions that prioritize stealth, reliability, and scalability.

Core Capabilities:

? Custom Malware Engineering

Development of low-level, custom-built malware with full evasion capabilities (FUD). Tailored to bypass specific AV/EDR signatures

while maintaining operational stability.

? Command & Control (C2) Infrastructure

C2 Servers: Custom-designed Command & Control frameworks with modular agent architecture.

Stealth Communication: Traffic obfuscation and dynamic domain generation to minimize detection footprint.

Scalable Management: Real-time payload deployment, session management, and data exfiltration pipelines.

? Data Acquisition & Exfiltration

Credential Harvesting: Custom cookie grabbers and password stealers designed for seamless user session preservation.

Phishing Infrastructure: High-fidelity phishing page creation, indistinguishable from legitimate enterprise portals.

? Financial Operations (FinOps) Tools

Crypto Asset Recovery: Custom ERC-20 token drainers optimized for speed and anonymity.
Card Processing: Advanced CC checker and killer suites for real-time validation and utilization optimization.

? Secure Communications

Proprietary E2E encrypted messaging platform featuring voice/video calling and secure screen sharing—ideal for sensitive team coordination or client briefings.

Why Work With Me?

Proven Track Record: 13+ years in the field.

Bespoke Over Generic: Every tool is engineered for specific threat models.

End-to-End Delivery: From code development to deployment infrastructure.

I am willing to work with trusted escrow/third party services to verify both parties are receiving their end.

can you please send me the Proven Track Record you talking about?

infostealer - October 12, 2026, 8:18 pm

If you want to see my work you should give me something to reach out to you on as I haven't been a member here long enough to PM you
