Thread: [No luck this season](#)

I usually look forward to NFL season, I usually have some insane luck when it comes to NFL betting and this year I just suck. I've been thinking I need to take a few weeks off from betting, watch some games and reset. I don't bet much, most I'll do is like \$10.

Anyone else thinking this season is kinda rigged?

I heard one announcer say about the NFL, "whatever you think is going to happen it's usually the opposite that does."

That's the way that I need to start betting. I have been getting crushed all season.

I knew a guy on here [SRT](#) that was needing money badly. He needed it that day. He had some bytes and went all in on slots and won like 250k bytes or something. Sold the bytes to Demon and was able to pay whatever the bill was. Crazy luck.
