Hi everyone,

I'm Amedeo Galletta, the developer behind theWebRooster. Based in Italy, I build custom WordPress websites, WooCommerce functionality, plugins and web applications for businesses and independent projects.

If you need a website with its own visual identity, a store with a more tailored buying experience, or a feature that your existing setup is missing, I'd be happy to discuss your project.

WHAT I CAN HELP WITHCustom WordPress themes: responsive layouts, business websites, portfolios, project galleries and content that you can manage through WordPress.

WooCommerce development: custom product pages, product configurators and purchasing flows, with configuration data carried through to the cart and order.

WordPress and WooCommerce plugins: dedicated functionality, settings and integrations built around your requirements.

Web applications and APIs: React and TypeScript interfaces, backend functionality, authentication and administration panels.

WORK YOU CAN REVIEW

[deleted]A custom WordPress theme for a construction business, featuring a project catalogue, an interactive project map and a guided quotation tool.

[deleted]A WooCommerce theme for home products and finishes, including a window and door configurator, product categories and showroom content.

[deleted]My open-source plugin, published in the official WordPress.org Plugin Directory. It adds deposits, linked balance orders and payment reminders to classic WooCommerce checkout flows.

LET'S DISCUSS YOUR PROJECT

Pricing is based on the scope of each project. Send me a private message here or use my [contact page](#) with:

Your current website, if you have one.

The main features or integrations you need.

Your preferred timeframe and budget range.

I'll review the requirements and put together a proposal for the work.
