Thread: [your wife is your boss !](#)

Jamika - October 14, 2026, 10:11 am

hello everyone

Today's question might be a little tricky. ?

Would you be okay with having your wife as your boss at work?

What if your work circumstances forced you into that situation, with her giving you direct orders as your manager?

Or would you feel that it was humiliating?

I'm interested in hearing your opinions!

My future wife and I will be a power duo, there is no scenario where I would step into a marriage in this situation.

Humiliated dawg, I ain't tryna have both that in my work and outside life

Humiliation. Never in a million years.

Enough to have her as the boss at home.

I couldn't do it. Not for the reasons listed above but just because I would treat her as an equal and not above me so I would for sure get in arguments when that normally is not really allowed with your boss otherwise they would just fire you.

Only if she beats the fuck out of me in front of everyone at the office.

Lmao nah for sure not, keep those 2 parts of my life separate

Well I would not mix work with private relationship so for me it's a no-not in the first place

I would prefer to keep work and family life separate.

It could cause unnecessary arguments at home.

Its not necessarily humiliating, it is dangerous though. If you make a serious mistake at work it will presumably be your wife giving that corporate disciplinary, if you have to be fired etc. it will be your wife doing it, overall its a disaster waiting to happen for both imo!
