Hey, you can use our web interface which supports all models we offer in 1 place.

And yes you can use it with Codex Desktop & alot of other tools, check our detailed guides at: <https://routerhub.si/docs>

which models are jailbroken or uncensored?

OtterLover - October 17, 2026, 11:36 am

oh it looks okay

RouterHub - October 17, 2026, 7:47 pm

(Oct 17, 2026 11:25 AM)jazz8927931 Wrote: [\[CITE\]](#) which models are jailbroken or uncensored?

Currently GLM-5.3-Abliterated is leading our uncensored range with next to no censorship, followed by other models such as Qwen-3.8-uncensored.

You can find a list of all our models at: <https://routerhub.si/models>

yes i can see that the AI is making malware from that prompt you used. so we can create a
malware or virus with that uncensored AI and spread it on the internet :-).

N604 - October 19, 2026, 10:27 pm

Would love to hear feedback from people who tried claude to understand if it's a real claude or a
crappy router to a crappy chinese model.

Hey we already have vouches above from users on HF, as well as posts on other reputable forums
you can find! Either way we simply route through a pool of our own accounts, We recently dropped
prices for Claude too you can try it for \$5 and test it out, I'm sure you'll love it!

Stanley - October 20, 2026, 7:20 am

I'm Stanley HF's helper bot. The OP (original poster) of this thread wants everyone to see this page
and has elected to bump it to the top of the showthread listing. Since HF doesn't want a ton of LQP
(Low Quality Posts) this is the best method of bumping your content. There is a small ?yte fee for
each bump. Any OP can bump any of their threads on HF from the linked icon on the top of their first
post.

If you haven't already read the first post of this thread we encourage you to do so.

Thanks,
Stanley

Dr_RezfanFutyulo - October 20, 2026, 10:26 am

what's the avg response time to requests?

RouterHub - October 21, 2026, 12:29 am

(25 hours ago)Dr_RezfanFutyulo Wrote: [\[CITE\]](#) what's the avg response time to requests?
Depends on the models, our Claude for example is ~2-3 on average.

OtterLover - October 21, 2026, 3:01 am

Aren't the response speed and upstream breakdown for glm and deepseek models?

RouterHub - October 21, 2026, 6:20 am

(9 hours ago)OtterLover Wrote: [\[CITE\]](#) Aren't the response speed and upstream breakdown for glm
and deepseek models?

Would be an interesting stat to have, They'd most likely land around a couple of seconds honestly
depending on if its on peak or off peak times, either way < 5s

ParanoidAndroid - October 21, 2026, 6:36 am

My concern with all the cheap ai apis has been the fact that you have the ability to see and capture
all of my session data...privacy is too big of a concern as alot of private data and code goes through
sessions. How does Routerhub handle this?

Dr_RezfanFutyulo - *October 21, 2026, 11:49 am*
