Thread: [how to set up spark rat - no port forwarding](#)

Raghav Sood - October 16, 2026, 10:28 pm

Im using a macbook air and mac operating system and i want to know how to setup spark rat using mamp free version. Also can someone show me how to configure spark rat and tell me does it have hvnc and live screen capture with mouse clicks?

also does it require port forwarding?

If I've never heard of this Spark RAT, you're unlikely to find anyone that does know. If you don't want to have port forwarding and still have the RAT accessible from the Internet, you need to run it on a machine directly exposed to the Internet with a public IP address. We'll assume that Static/Dynamic NAT does not apply.
