Thread: [Who can create me a Session Initiation Protocol program](#)

lackertacker - October 16, 2026, 10:37 pm

get at me for me details

DramaKing - October 17, 2026, 7:38 am

Just call it SIP and explain why the myriad of existing options are not good for you.

Didn't mean to be critical but asking why you need a custom program is a simple question. You must know that there are many softphone options already.

Oh, you're actually asking for an exploit. Older n-day exploits are public and easily searchable. GitHub and ExploitDB are good sources. Unpatched SIP exploits will probably run in the hundreds of USD.
