Thread: [Shadow HVNC stealer checker Hidden control without borders](#)

ShadowHVNC - October 17, 2026, 12:52 am

SHADOW HVNC — THE FULL RANGE OF COVERT MONITORING

? Current version: maximum resilience, reverse proxy, checker for over 7,000 services

? loading encrypted image...

? To make a purchase, please message: ? @Lixelysup (Telegram) ?

? Telegram for ordering and checking the latest version:

? [deleted] ?

KEY FEATURES

1. Hidden VNC — Full-featured stealth mode for using Chrome + Chrome session parsing
2. Keylogger — Captures everything the victim types + improved formatting and stealth mode.
3. File Manager — View, download and upload any files.
4. Process Manager — Terminate processes and gain full control over running programmes.
5. Grab New Browser Data — Refresh cookies and recent sessions with a single click.
6. Deploy new exe — Remotely launch any .exe file on the victim's machine.
7. Notes — Notes on each victim (PayPal, cryptocurrency, etc.).
8. Telegram Notifications — Instant alerts about new connections sent directly to your Telegram channel.
9. Audio alert when a new client connects.
10. AFK Timer — Shows the victim's idle time.
11. A screenshot is logged when a connection is established.
12. Improved clipboard synchronisation and support for multiple monitors.
13. A checker and sorter that verifies the validity of cookies
14. Stiller – compatible with many well-known checkers
15. Telegram, Steam & Discord session grabber
16. Option to add your own patch to the build

?? BUILD SPECIFICATIONS ??

? Browser support: Edge, Chromium, Chrome 144+, Firefox (SQLite / cookies)

? Data grabber: Cookies (JSON + TXT Netscape), passwords, autofilled forms, user information

? Cleanliness: No plain text in the binary (everything is runtime-based), weekly clean-ups, easy to encrypt

? Resilience: Very difficult to kill + extreme persistence

? Geoblocking: CIS countries

DATA COLLECTION: BROWSERS, WALLETS, APPS

Quote: ? loading encrypted image...

? Browsers Edge, Chromium, Chrome 144+, Firefox — passwords, cookies, forms, fingerprints.

? Apps and tokens Steam tokens, Discord tokens, Telegram tdata (app registration).

? Manual control + automatic cryptocurrency withdrawals. Full control over the funds you've raised.

? REVERSE PROXY AND TUNNELLING

Quote:? loading encrypted image...

? SOCKS5 support

? Works with anti-detection browsers (Dolphin, Indigo, GoLogin, etc.)

? Tunnels for all protocols: RDP • SSH • HTTP • HTTPS • SMB • MySQL • MSSQL • VNC

? Active tunnels panel

- A green flashing dot for each tunnel
- Copy button (127.0.0.1:port to clipboard)
- 'Stop' button for each tunnel

STABILITY SYSTEM (PERSISTENCE)

Quote:Disguised as: WmiPrvSE.exe — Windows Management Instrumentation (WMI) provider host

The executable copies itself to various locations as a backup

Installs WatchDog — ensures the client is restarted at boot time

Two levels: registry key + scheduled tasks

Persistence via schtasks — works on all versions of Windows without PowerShell

Self-deletion of WatchDog via a command-line trick

Advanced persistence features for 2026

? PREMIUM FEATURE: SHARING ACCESS TO THE VICTIM

Quote:? loading encrypted image...

PREMIUM FEATURE: SHARING ACCESS TO THE VICTIM

Sell access to the victim to another buyer (Premium version only: \$450/month) — can be purchased whilst using the service.

The buyer receives:

- Stylist logs
- HVNC
- Incognito browser
- Reverse proxy and more

The buyer does not need to pay for a subscription to our software — you create the link yourself, which they will use to access the victim.

Log format and other dashboard screenshots + Shadow updates

Shadow HVNC v4.0

Full-featured HVNC — a toggle switch between open browsers/windows has been added to the toolbar.

The method for stealing Steam tokens has been updated — you can now retrieve the tokens.txt file, and a button has been added to the toolbar to refresh the tokens.

Bugs fixed: clients being lost when their PCs are restarted; incorrect 'online' status for disconnected users.

Connection stability between client and server has been improved.

Warning: a price increase is planned for early June – purchasing now locks in the current price.

Shadow HVNC v4.7

File collection extension

Remote access: TeamViewer, AnyDesk (service.conf), .rdp files, MobaXterm, mRemoteNG, Royal TSX

Gaming clients: Steam, Epic Games, Rockstar Games Launcher, EA Desktop, GOG Galaxy, Ubisoft Connect, Battle.net, Minecraft launcher profiles, Valorant / Riot

Wi-Fi passwords: all saved profiles (netsh) – SSID + password in plain text

Sensitive files (credentials)

Names: password, seed, wallet, recovery, mnemonic, private key, backup, token, 2fa, auth

Types: .txt, .pdf, .doc, .docx, .xls, .xlsx, .csv, .rtf, .md

Locations: Desktop, Documents, Downloads, OneDrive. Limit: 100 files / 50 MB

Sensitive files (identity documents)

Names: passport, ID card, national ID, driving licence, SSN, social security, birth certificate, visa, insurance, tax, bank statement, utility bill, invoice, receipt, payslip, mortgage, tenancy agreement

Types: .jpg, .jpeg, .png, .tiff, .heic, .webp, .bmp, .pdf, .doc, .docx

Locations: Desktop, Documents, Downloads, OneDrive, Pictures. Image limit: up to 15 MB

System information + HTML injection + screenshots

computer name, username, OS version, local and public IP, MAC address, CPU, RAM, disk size, number of monitors, locale, keyboard layouts, software list, processes

The virus takes numerous screenshots whenever the victim visits banking sites, crypto wallets, Steam or investment portfolios — the operator can view the balance in real time.

Shadow HVNC v5.0

Main change: All the features of Vidar Stealer have been added to Shadow Stealer, along with a host of unique capabilities.

New tool: Mimikatz – extracts the following from LSASS: plaintext passwords, hashes, PINs, Kerberos tokens and other data.

Return Policy / Terms of Use

Quote:1. General Terms and Conditions

1.1 This User Agreement governs the relationship between Shadow and the user in connection with the use of the Shadow product.

1.2 By using the Service, you agree to the terms of this Agreement.

2. Access to the Service and Payment

2.1 Access is provided on a subscription basis (monthly or for several months).

2.2 Payment constitutes acceptance of this Agreement.

3. Warranties and Conformity

3.1 We do not guarantee the absence of downtime or errors.

- 3.2 In the event of material non-conformities, you are entitled to request rectification.
- 3.3 If the issue is not resolved within 7 days, a refund will be issued for the unused period.

4. Refund Policy

A refund is possible if: the service is completely non-functional or does not match the description for more than 7 days; the error has affected traffic loss.

A refund is NOT possible if: the build has been generated, the subscription has been activated, or the service has been paid for.

Refunds are calculated in proportion to the unused period.

5. Limitation of Liability

5.1 The service is provided 'as is'. We are not liable for failures on the part of hosting providers, internet connection issues, user actions, or force majeure (including an alien invasion and the TS's hangover).

5.2 Maximum liability = the amount paid for the most recent period.

5.3 We are not liable for consequential losses or for the functionality of modified builds.

6. Changes to the Agreement

6.1 We may amend the terms at any time.

6.2 Continued use constitutes acceptance of the new terms

7. Disputes

7.1 Disputes shall be resolved through negotiation; where this is not possible, they shall be referred to arbitration by the forum.

8. Subscription termination

Subscription will be terminated without a refund in the event of: uploading malware to VirusTotal, attempted hacking, transferring the licence to others, insults or threats, or scanning resources using bots. In the event of a breach, the right to request arbitration for up to three times the cost of the subscription is reserved.
