Thread: [\[POLYMARKET CRYPTO BOT\] 8 strategies, source code included & support](#)

Dave Skylark - October 17, 2026, 8:40 am

- ? Full Go source code access
- ? Lifetime software updates
- ? Direct support channel
- ? Setup wizard included
- ? Runs on your own machine
- ? No API rate limits imposed by us

The source code is provided so you compile the code, it's literally 2 steps but this way you can use an AI or check for yourself the code before running.

The bot itself comes with a series of strategies configurable by you in the dashboard and with paper mode so you can try these and understand how they work.

You must make sure you can trade on polymarket before buying, as some zones are restricted. Still, for trading purposes it is recommended to get an AWS EC2 in Ireland as it's the closest in distance to Polymarket's CLOB servers.

Screenshots of the bot's dashboard.

Spoiler [\(Click to View\)](#)

Prediction/crypto trading involves substantial risk, past performance does not guarantee future results. Never trade with funds you cannot afford to lose.

Due to the nature of the product (source code) the only accepted payments are crypto.

\$49 ONE-TIME-PAYMENT (Crypto)

I'm Stanley HF's helper bot. The OP (original poster) of this thread wants everyone to see this page and has elected to bump it to the top of the showthread listing. Since HF doesn't want a ton of LQP (Low Quality Posts) this is the best method of bumping your content. There is a small ?yte fee for each bump. Any OP can bump any of their threads on HF from the linked icon on the top of their first post.

If you haven't already read the first post of this thread we encourage you to do so.

Thanks,
Stanley
