Thread: [App/Panel for Mass Google Review Report](#)

allesbaba - *October 17, 2026, 10:48 am*

So I am looking for an app or something that can be used to mass report fake google reviews. Does such thing exists? Ideally it should have the possibility to "age" the google accounts used for it like to watch videos, and so on. Does such thing exist?

Yes, I do have a professional script/tool specifically built for this purpose!

? Key Features & Capabilities:

- Account Aging & Farming: The tool doesn't just use raw, flagged fake accounts; it simulates natural human behavior (such as watching videos, browsing, and interacting) to warm up and age Google accounts so they become fully trusted and bypass security walls.
- Safe & Programmed Mass Reporting: An advanced system designed to report harmful or fake reviews gradually and strategically to prevent any bans on the executing accounts.
- Full Automation: Runs on complete automation to execute tasks accurately and swiftly without manual intervention.

? Total Price (with full access & script file): \$85

If you are serious and want more details on how it runs, let me know
