Thread: [Zcash vs XMR](#)

Pimping - October 17, 2026, 8:49 pm

What is the reason of the huge Zcash pump within the last few months? Why isnt XMR doing the same considering they are both privacy coins... and XMR actually is private and been established longer

unfortunately i have \$0 in either one. I was thinking of buying XMR in the hopes it follows like Zcash has... does anyone really know why its pumping so much?

Costanza - October 18, 2026, 2:15 am

Zcash has great marketing all it comes down too ; every coin has 0 use tbh. just who can manipulate the public lol

Mewtwo - October 18, 2026, 5:40 am

Monero is 100% privacy. Many exchanges delisted it. It's also banned in certain countries.

I do invest in Monero. I like how much of a steady growth it has. Even when markets go down, XMR doesn't dump has heavily as alt coins do.

I have noticed the XMR price is pretty steady

noticed some days it randomly will pump 2-5% too when the overall market isnt doing anything
