Thread: [My iMac G3 collection](#)

Bastille - *October 18, 2026, 12:07 am*

I'm not particularly an Apple's fan but I have to say that Apple was ahead of time regarding their products (speaking about Steve Jobs time only), especially when Steve Jobs came back to save Apple after being fired in 1985 (returned in 1997).

I especially like the iMac G3. There are two main versions (before and after half of 1999). It brings me back to the early 2000 and brings a lot of memories.

Differences in images :

Spoiler [\(Click to View\)](#)

This is my current collection (2nd design only : Tangerine, Graphite, Blueberry, Ruby, Slime, Indigo)

I'm only into transparent ones, I'm not interested in the Blue Dalmatian, Flower Power, or Snow ones. Aside of being less beautiful in my opinion, Blue Dalmatian and Flower Power are more rare and of course more expensive. I would like to get a Grappe (purple) and either a Sage or Strawberry (pink)

I also have two working iMac G4

So far I've spent 250e for all of them, some were sold with original keyboards and mouse, but others were alone, without accessories.

Anyone into collecting old Apple devices, or old computers or anything else ? :)
