Thread: [Regarding browser notifications.](#)

Jamika - October 19, 2026, 12:56 am

Dear omni and Members

I'm not sure if this is happening only to me or to others as well.
However, there's a small issue with the forum's browser notifications.

The notifications that appear when there's a new reply.

Now, if there are several notifications, they stop coming through, and I receive a message like the one shown in the picture.

Is this normal?

DramaKing - October 19, 2026, 4:55 am

Is it normal to get any browser notifications?

And what picture?

xadamxk - October 19, 2026, 7:45 am

Is there supposed to be a pic?

clark.dll - October 19, 2026, 12:57 pm

I'm not seeing any reference picture but I'm on mobile.. maybe that's why?

Please ensure you've included a picture.

Jamika - October 19, 2026, 1:43 pm

? loading encrypted image...

sorry forgot to add image , here it is

Can't really see the full message clearly. If you click on the down arrow, what else? Can it be bypassed/ignored?

Omniscient - October 20, 2026, 8:27 am

Tell Chrome it's not spam.

Th3HulK - *October 21, 2026, 9:39 am*

Chrome is obviously blocking notifications from HF as it detect as spam.
