Thread: [What Game Deserves a Remake?](#)

Yin Yang - October 19, 2026, 12:50 pm

I really want to see either Vectorman or War of the Monsters get a remake. Both games have so much potential on modern hardware, and I think they'd be awesome to revisit.

How about you guys? What older game would you love to see get the remake treatment?

There was a game called Nemesis of the Roman Empire. I think a new version of it would be amazing, especially if they added online multiplayer.

Medal of Honor would be great too.

I remember when we used to play it at the internet café and say that the main rule was no snipers and no rocket launchers... Only the most skilled players survive!

I used to spend a fortune at internet cafés... They practically relied on me to pay their household expenses, haha.

Resistance Trilogy by Insomniac Games.

Finding another person that played Vectorman is rare.

Remake wise, I would honestly love to see 007 Goldeneye get the time and attention it deserved. DLC for new maps, missions, and characters would be tremendous. I know there is the Xbox 360 remake that took place, but it never really went anywhere.

I'd also gladly take Jet Force Gemini with better controls.

Klonoa: Door to Phantomile.. such an under-rated and not really talked about game

I really enjoyed Need For Speed Pro Street back in the day on Xbox 360. Superman on Xbox 360 was pretty fun also.

Gauntlet Legends and Gauntlet Dark Legacy please.

I'd love to see a proper remake of the original Legacy of Kain: Soul Reaver. The atmosphere and the story were incredible, but the original PS1 graphics and camera controls are hard to go back to. With modern tech and a fixed camera, it would be a masterpiece.

Simpsons Hit and Run imo it was my favorite childhood game

I heard they were in talks to actually remaster it so we will see how that goes

Tom Clancy's Splinter Cell: Double Agent.

I would also like to add Pong, how has no one improved on that in years. Its time for a 2026 update. Maybe managers expansion pack?

I'd like to see a remake of the Simpsons psp/ds game. In fact I'd probably like to see a remake of most of those handheld console games. Ahead of there time.

Just finished all the mafias, that was probably something I would really want to see if it wasn't made (3 is shite)
