HOW MONTHLY BILLING WORKS

Your monthly platform charge is the higher of your monthly minimum or the total calculated provider commissions. These amounts are not added together.

Example for the Casino package:

- €400 in calculated commissions -> €590 monthly charge.
- €900 in calculated commissions -> €900 monthly charge.

The first month's minimum is paid upfront and credited against that month's commission. Rates vary by provider and package.

Prices are in EUR and exclude taxes. Setup and the first month's minimum are payable in crypto. Marketing, staffing and payment-related expenses are separate operating costs.
