Thread: [DuckDNS dns](#)

laki991 - October 21, 2026, 2:56 am

Hello Guys.I need help

I use DuckDNS; as of yesterday, pinging my DuckDNS domain points to an unknown IP—specifically, sinkhole.hyas.com (192.169.69.25)

I have no idea where this came from. Do you have any thoughts on why this is happening and how to fix it?

DramaKing - October 21, 2026, 3:58 am

I do. You got blackholed after using a non-bulletproof free service. If you don't want to do the time, don't do the crime.

How can I return it? I changed the token. Perhaps you could help me? ? My domain is managed by someone else.?

Yeah, because it was abused and taken over. This is just something that you have to accept as a cybercriminal.

Did you receive a ban notice?

I have used this domain for over 3 years. ? I admit I made a mistake—it's a free service. I had quite a few users on the domain. Now, however, someone else is using my domain.? I am verified on that site using my Google account. Tell me in simple language. What should I do?

Pray that you never logged in without a VPN. Your account is clearly burned. No one else is "using" the domain.
