Thread: [\[LAUNCH SALE\] ALL IN ONE Exchange Validator Bot | 18 Exchange Checkers](#)

DataRUs - October 21, 2026, 4:50 am

? INTRODUCING: ALL IN ONE CRYPTO EXCHANGE VALIDATOR

The Ultimate Enterprise-Grade Validation Infrastructure

Stop wasting time and credits on single-exchange tools that bottleneck your workflow. We have engineered the most powerful, reliable, and cost-effective validation bot on the market, designed specifically for professionals, database owners, and marketers who demand precision at a massive scale.

Whether you are cleaning massive lead lists, verifying databases, or filtering airdrop wallets, our unified system integrates specialized email checkers and advanced phone checkers across the industry's most prominent exchanges.

? SUPPORTED EXCHANGES (18 Total)

We only cover the top platforms that actually matter.

? CORE FEATURES & CAPABILITIES

? Lightning-Fast Automation: Engineered with multi-threaded architecture for maximum speed without compromising accuracy.

? Massive Scalability: Seamlessly process up to 20,000,000 (20M) lines per single check with stable, uninterrupted performance.

? Risk-Free Uptime Guarantee: System-monitored reliability. If any specific exchange checker experiences API downtime, automatic refunds for those lines are instantly applied to your balance.

? Seamless Crypto Payments: Fund your balance securely and anonymously. We accept LTC, USDT (TRC20/ERC20), BTC, and ETH.

? UNBEATABLE LAUNCH PRICING

We are currently running our Launch-Sale pricing, making us officially the cheapest per-line validator on the market.

Base Rate: Just \$1.43 per 2,000 lines.

Bulk discounts automatically apply for high-volume database cleaners.

Why pay premium SaaS prices when you can get enterprise-level infrastructure for fractions of a cent per validation?

? WHO IS THIS FOR?

Database Owners & Brokers: Clean and segment millions of records overnight.

Crypto Marketers: Ensure your email/SMS campaigns only hit active, verified exchange users.

Airdrop & OSINT Hunters: Rapidly filter massive wallet/contact dumps for active accounts on target exchanges.

? HOW TO GET STARTED

Getting started takes less than 60 seconds. No complex software downloads or proxy setups required—everything is handled via our premium Telegram infrastructure.

1 Start the Bot & Create your Account:

Join the Official Channel (For Updates, Proofs & Giveaways):

Load your balance via Crypto, upload your .txt file, and watch the bot work.

? FREQUENTLY ASKED QUESTIONS

Q: What format should my lists be in?

A: Standard .txt format, one entry per line. The bot automatically detects and separates email and phone formats.

Q: Do I need to provide my own proxies?

A: No. Our enterprise-grade infrastructure handles all proxy rotation and API management on the backend. You just upload and validate.

Q: What happens if Binance or Bybit is down for maintenance?

A: Our bot pings endpoints before processing. If an exchange API is unresponsive, the bot skips it and automatically refunds the credits for those specific lines so you never lose money on downtime.

Q: Are vouch coppies available?

A: Yes, just send us a mssage and we will give you some free credit on your account.
