Thread: [\[TUT / PART3 \] HOW TO MAKE YOUR VIRUS ALMOST FUD easily and for free \[PART 3\]](#)

Breakbot - August 25, 2010, 1:52 pm

Hi

as i promise , here's my third Tutorial for making your viruses almost FUD for 0\$.

PS : sorry for my really bad english .

let's start :

in this third new tutorial i'm gonna use 2 softwares

1/ aspack : a compression tool

Quote:<http://www.aspack.com/>

2/ molebox : a rprotection tool .

Quote:<http://www.molebox.com/>

ok , now you have the tools that we need .

[img]<http://shup.com/Shup/406781/1.jpg>[/img]

first we gonna use ASPACK .

[img]<http://shup.com/Shup/406783/2.jpg>[/img]

just click open to browse the server , click open . he gonna compress it automaticly .

compression complete , now we gonna use Molebox .

[img]<http://shup.com/Shup/406786/3.JPG>[/img]

follow the steps on the screenshot .

[img]<http://shup.com/Shup/406787/4.jpg>[/img]

click exit without saving (yes)

Done ! ?

now it's time for scan :

BEFORE

[img]<http://shup.com/Shup/406795/SCAN1.jpg>[/img]

AFTER

[img]<http://shup.com/Shup/406798/scan2.jpg>[/img]

so there you go now you can enjoy your UD without any crypters.

casarat

?

took me over a hour to post the tutorial , at least say a thanks :)

please don't send me Pm to asking for a download link for Molebox , Cuz i don't have it anymore !

Gibson - August 25, 2010, 1:56 pm

would a free public crypter be easier? xD
But still a great tut :)

Breakbot - August 25, 2010, 1:58 pm

lol use a crypter will not make your server fud for not even 3 days ;)

test this method and you will see

Illiii3e - August 25, 2010, 2:45 pm

hey bro why don't you post full version of this softwares ?
thanks anyway ;)

Breakbot - August 25, 2010, 2:51 pm

sorry dude , i don't post dowload links anymore .
it's very easy to find .

xhokli - August 25, 2010, 4:17 pm

what about the output file your shit2 where to get it explain a little bit better

Breakbot - August 25, 2010, 4:26 pm

output file is the new server the protected one .

xhokli - August 25, 2010, 4:31 pm

doesnt work for me the file now is 1.35 mb but if i click on it it dont respond to the host with the data

SIM-353284 - August 25, 2010, 4:32 pm

wwhy are your pics so blurry?

`Jacob - August 25, 2010, 4:36 pm

Thanks for that contribution, will help alot of people from creating threads here I hope.

Breakbot - August 25, 2010, 4:47 pm

Xhokli , just follow the steps , you did something wrong dude .

outlaw i donnu dude , maybe a bug in the host

popolgaga - August 25, 2010, 5:32 pm

is this runtime ?

is this working with cybergate and darkcomet ?

thanks anyway

Breakbot - August 25, 2010, 7:31 pm

yes 100% working with cybergate , darkcomet .
runtime/scantime

himaxtan - August 25, 2010, 7:39 pm

nice tutorial ,, it's useful for a rapid cryptting :)

Ajax - August 25, 2010, 8:03 pm

What happens if I crypt it after I do this?

`PRODIGY™ - August 25, 2010, 8:05 pm

It will most likely be corrupt. This is an easier alternative to crypting/FUD

zIFuLLiLeTe - August 25, 2010, 8:25 pm

very nice tut.. someday ill try this method and see the outcome..

Draginz - August 25, 2010, 9:24 pm

Eh, when I try to run it, I get a very distinct message:

[img]http://filesmelt.com/dl/warning_ass.PNG[/img]

Does this happen to everyone else?

Oh, and also when I click 'Yes', I get the 'this program encountered an error' popup.

Hide_My_Ass - August 25, 2010, 9:47 pm

Nice tut, pretty simple and ya crypters last 2.5 days -.- at least public ones.

heyhowslife - August 25, 2010, 10:22 pm

thanks bro .. good jobbb !!!

xhokli - August 26, 2010, 2:36 am

does it work with istealer or not

ahsanciit - August 26, 2010, 3:15 am

it dosent wrkz 4 me...and software hav trial versn...want full versns man/////

Breakbot - August 26, 2010, 6:23 am

guys like i said , it works with evrything .

for the dude that have a demo error , just look for a cracked molebox . it should work without any problems .

matador93 - August 26, 2010, 7:26 am

awesome !! Dude thanks only Avira AntiVirus detects it "TR/Crypt.XPACK.Gen"
thanks ^^

popolgaga - August 26, 2010, 8:38 am

so is there anyone who have a crack or a serial for molebox pro ?

Mashimaro - August 26, 2010, 10:29 am

im so so so happy

i also bad english

are you kor?

if you are right, pm me

ahsanciit - August 26, 2010, 10:45 am
so plz giv us a full versn...thxs

Breakbot - August 26, 2010, 11:10 am
for the molebox cracked version Pm me . and i will pM you back the download link .

casarat

h3h3y9 - August 26, 2010, 11:28 am
really nice tutorial mate :)
saw all parts!
thank you!

Breakbot - August 26, 2010, 4:30 pm
thanks dude .

Spoiler ([Click to View](#)) short message

faqs - August 29, 2010, 2:24 am
Hey ...bro....i sent you a PM..Please give me link of Molebox cracked Version..

canibusfan - September 12, 2010, 3:19 am
(Aug 25, 2010 04:31 PM)xhokli Wrote: [CITE](#) doesnt work for me the file now is 1.35 mb but if i click on it it dont respond to the host with the data
Ya I got the same result as you did. This doesnt work at all....

MartyK - September 12, 2010, 4:51 am
regardless of if you have the full version of molebox... It still doesn't work properly. It does something to the 'infected.exe' to prevent it from doing certain things.. for example a keylogger.. Doesnt bring the logs back... at all.

Ikkuu - September 12, 2010, 5:14 am
Thank you for posting wonderful tutorial ?

iLoveHack - September 12, 2010, 5:49 am
ASpask

its expeired =[
what ido

The Real Kobe Bryant - September 12, 2010, 6:16 am
Incredible tutorial, great job, and very easy to follow.

Breakbot - September 14, 2010, 8:14 am
thanks for comments . iloevhack , you can try to find a cracked one

canibusfan maybe cuz you are too NOOB to Follow a tutorial ?

i'm using with tutorial over 1year and a half now , it works like charm , with bifrost , spynet , cybergate , darkcomet , istealer...

x_SparX_x - September 14, 2010, 9:36 am
Grate Information you shared with us..very helpful nice tutorial.

Thank you for the sharing,.

samadniazi - September 14, 2010, 10:11 am

100% works for me

thanks alot casarat....

botnous - September 14, 2010, 10:35 am

Nice tutorial

but wouldn't it be easier to use a free crypter?

Mr. Gold - September 14, 2010, 10:58 am

Pretty awesome, so my kaspersky will not find this?

Dr. Dre - September 14, 2010, 11:30 am

It works great mate. Thanks for this, i will never use a crypter again, but someone needs to crack the real version because in order to open the fud file, you have to click ok everytime you open it.

Breakbot - September 14, 2010, 1:26 pm

you need to find a cracked one . and you will never get any message :)

all you have to do after is to change the icon if you want :D .

CASARAT

for the cracked molebox version please send a PM .

in order to get it you need to :

- atleast 200 posts
- or
- leet / ub3r

kay0lix - September 14, 2010, 3:32 pm

Thanks, 3/16 :).

Got another idea to get it FUD?

Breakbot - September 14, 2010, 4:45 pm

this 3/16 will stay for a very long time .

take a look at my other tutorials .

kay0lix - September 14, 2010, 4:48 pm

Okay, I'll take a look.

.

Breakbot - September 14, 2010, 5:46 pm

i'm not giving the cracked version to anyone under 200 posts or leet/ube

don't waste your time sending PM's .

thank you .

canibusfan - September 14, 2010, 5:53 pm

this doesnt even work, so dont even bother anymore with this thread!
and im using the cracked version

Breakbot - September 14, 2010, 7:44 pm

Kid , is not my problem if you SUCK and you can't even follow a freaking Tutorial .
don't be mad :)

zackry2 - September 14, 2010, 7:50 pm

Thanks! This will go great with my bot... :)

sTaTic^ - September 24, 2010, 2:44 am

6/16 on spynet, it's ok but I've done better with pub crypters, at least this will stay longer though.

robinhopok - September 24, 2010, 6:52 am

Lol good stuff bro, nice tutorial.

?ntel - September 24, 2010, 8:42 am

Just one question, why was the scan titled "After" done three days before the scan titled "Before"?

Breakbot - September 25, 2010, 5:10 pm

i dont really remember the time of the scan ,; but i guess in the same day ?!?! lol

bradhowesable - September 26, 2010, 8:49 pm

This worked for me, its not FUD but its a 6 out of 16 on novirusthanks scanner.

Maasie - September 26, 2010, 10:21 pm

Pretty good results, but making your own crypter works good too. What happened to your awesome avatars btw?

Breakbot - September 27, 2010, 10:32 am

hmm what avatar ?

I can't upload an avatar anymore , i don't know why it gave me an error .

anything_a - November 21, 2010, 1:40 am

love it it works!

too short

Fallenbot - November 21, 2010, 3:31 am

I like the simplicity of this tutorial. I hope it doesn't corrupt the server,appreciated.

doctorsql - November 21, 2010, 9:30 am

Wow , nice tutorial brother !

AnonymousG - November 21, 2010, 12:02 pm

Thanks for this. This is random because message to short.

danidani123 - November 21, 2010, 12:19 pm

gonna try this someday :)

thank you !

Doggie! - November 21, 2010, 12:59 pm

lol...With my tut (posted more than 3 months ago) i still get 2/16 xD
I dont mean to flame but just sugesting try Xenocode :P

Breakbot - November 21, 2010, 1:02 pm
rofl

i already posted a tut using xenocode mate ;), posted 3/4 mounths ago ;) take a look at my threads

Zombiecrusher - November 21, 2010, 1:08 pm

Thanks for this! I have been looking for one of these for a while!

validbj - November 28, 2010, 12:16 pm

very nice tutorial and it worked thanks a lot

Eight - November 28, 2010, 12:36 pm

Thanks for the tutorial, I was having some trouble with crypters found on this forum and my .net framework installation, but this worked like a charm.

sethboy66 - November 28, 2010, 2:00 pm

this looks like a legit way to do it but its not ud which is bad

armysniper - November 28, 2010, 9:50 pm

Thnx, though in the future, hopefully we find a easyr way

Breakbot - November 29, 2010, 12:05 am

armyniper , an easier way ? buy acrypter :D OR create your own one

rickiross - December 1, 2010, 12:09 pm

god damn shi"... kaspersky cant find it but . im givin it up. i tryed every method., but Nothing of them worked. even this fuck###ng mole aspack and xenocode. kaspersky saivs its clean but Avira Antivir did find it. and if i start it the server crashes... dont know what to do guys

BguyTheKing - December 1, 2010, 11:10 pm

I really like the way you demonstrate stuff.

PongViking - December 5, 2010, 11:00 am

When I crypt my trojan with this method, will it be runtime, or only scantime UD ???

Chebyshev - December 5, 2010, 11:10 am

(Aug 25, 2010 01:52 PM)Breakbot Wrote: [\[CITE\]](#) HI

[img]http://shup.com/Shup/406798/scan2.jpg[/img]

so there you go now you can enjoy your UD without any crypters.

casarat

?

took me over a hour to post the tutorial , at least say a thanks :)
Nice tutorial, not FUD, but still workable to add to some undetectability.

Rodrigo - December 5, 2010, 11:11 am

nice tutorial
great job :)

PongViking - December 5, 2010, 11:22 am

(Dec 5, 2010 12:00 PM)jameshacker Wrote: [\[CITE\]](#) When I crypt my trojan with this method, will it be runtime, or only scantime UD ???Please Reply, I really need to know this !!!

Doobies - December 5, 2010, 11:37 am

Nice and great Tut you made.

Breakbot - December 6, 2010, 11:50 am

Both .runtime and scantime and i responded to this question 20.000 times dude lol

hikocham - December 7, 2010, 7:46 am

Thanks for all,
i've just a problem how to send an email to yahoo, hotmail, or gmail, it can not be receive by them,
so please could you advise.

thanks

unknown2oall - December 7, 2010, 10:05 am

I guess, i can't see any Screen shots . Is it just me ???

mecatrix - December 7, 2010, 10:36 am

thx, helped me much appreciate it alot =)

hikocham - December 7, 2010, 2:19 pm

pls help me, the server it couldn't send email to yahoo nor gmail?

Breakbot - December 7, 2010, 2:41 pm

wtf dude , english can you speak it ?

I Can't understand what are you talkin' about

hikocham - December 11, 2010, 3:38 am

Hi,

the server is fud ok, but my problem is that i don't receive any message to my adresse as gmail or hotmail, i don't know if i should use noip or what ? that i can receive the ip of my victim.

Thanks for your help

Eshta - December 11, 2010, 4:58 am

Great saved for later

until i can port forward my router :(

Echo1337 - December 11, 2010, 5:26 am

gonna give this a try now

Breakbot - December 11, 2010, 5:54 am

OK Go ahead and don't forget to post resulsits ^^

breakbot

The Real Kobe Bryant - December 11, 2010, 9:49 am

I think that this corrupts most rats and stealers, but I will try it myself and find out.

rbhavoc - December 11, 2010, 9:51 am

This still works thank you bro for the contribution

ado11 - December 11, 2010, 10:15 am

very nice tutorial

Results for me

CyberGate 3/16

SpyNet 4/16

ThE-iNFILTrATOr - December 11, 2010, 10:16 am

Bookmarked will try later thanks for this tut.

Breakbot - December 11, 2010, 1:26 pm

(Dec 11, 2010 10:49 AM)The Real Kobe Bryant Wrote: [CITE](#) I think that this corrupts most rats and stealers, but I will try it myself and find out.

not at all , i've been working with this method for over 5 months
, it doesn't corrupt anything ?

iDeX - December 11, 2010, 1:59 pm

please re update the images please

hikocham - December 11, 2010, 2:39 pm

Hi friends,

i made the trial with prorot and it gives problem of sending data to an email adress, so could you advice me with what i should work, and pls tell me the best one of the rat, then if you can give where could i download it ?

regards

Breakbot - December 11, 2010, 4:43 pm

Hikocham , wake up dude . you still using Prorat ? lol

anyways , i didn't test it with prorot but i'm sure it works with all the others .

and i'm sorry i can't re-update the screens cuz i don't use those softwares anymore plus i don't hack anymore too

Modestep - December 12, 2010, 3:41 am

Its working with spynet, thanks

hikocham - December 12, 2010, 3:48 am

Thanks a lot, i am juste gonna to try spynet but i don't have link for that.

Breakbot - December 12, 2010, 7:03 am

LOL , well use the search button mate

iamsopro - December 12, 2010, 8:37 am

works with istealer?

Spoiler ([Click to View](#))asdasdasdasdasdas

Breakbot - December 12, 2010, 10:35 am

iamsopro i will not answer to this stupid question . try or gtfo :)

B0u7n31F - December 12, 2010, 12:08 pm

Thank you very much i will tru this !

???G? - December 12, 2010, 12:14 pm

Lol! This one of the most effective tutorials in the world :D! This guy is the best, thanks for the great tutorial even though I dont need crypting anything atm :D

Breakbot - December 13, 2010, 8:29 am

haha thanks Yassine !

Breakbotxxxx

Nort - December 13, 2010, 8:32 am

Great totorial!

I will try this when I will create my new virus!

SoftwareDev - December 13, 2010, 1:13 pm

this is a great guide thanks, not perfect but definitely worth using if the free crypters are dodgy :)

iDeVeLoPeR - December 16, 2010, 1:53 pm

Thank u man.

This is really useful

RiperFish - December 16, 2010, 2:45 pm

(Aug 25, 2010 01:58 PM)Breakbot Wrote: [\[CITE\]](#) lol use a crypter will not make your server fud for not even 3 days ;)

test this method and you will see

lol, xD, my friend made a crypter, and the server was FUD for 2months ;).

Breakbot - December 16, 2010, 2:52 pm

lol algerian . well we are talking about Public crypters not private ;) , learn how to read

doctors - December 16, 2010, 3:16 pm

Thnks 4 share man .. ;) .. btw can i change the icon using Res or whatever ? because i tried that with Res without any luck..

Breakbot - December 16, 2010, 3:56 pm

yeah try reshacked . or iconchanger or trhy to find a free icon changer here theres a few good ones here

Water Bottle - December 16, 2010, 7:51 pm

Good job with this tutorial. It works perfectly..except..I can't get it to not corrupt my Dark Comet server. Is it just me or has anyone else had this problem?

sear8 - December 16, 2010, 10:12 pm

Sir do you have a serial key for molebox? I try to use only molebox and it work though the molebox is not registered sn i get this prompt when i run may server that molebx is not registered,

paytheprice - December 16, 2010, 10:14 pm

just buy a private crypter,it is better for 10 dollars you have one

sear8 - December 16, 2010, 10:29 pm

Don't have money lol, any way if any of you guys have a full version please share,

PS.

Even if i have money i don't have a bank/credit card duno how to pay,

casarat

?

took me over a hour to post the tutorial , at least say a thanks :)
in what site did you do the scan ??

Deathvault - December 17, 2010, 7:28 am

bookmarked. Ill try it tomorrow

asker - December 17, 2010, 8:59 pm

yes its working dude thanks for sharing it :)

819tobman - December 17, 2010, 9:11 pm

Works for what its worth. Good job.

jcarter - December 17, 2010, 9:55 pm

wow thanks help me out alot

c00ldodo - December 18, 2010, 1:27 am

sweet thanks a bunch dude :D

Breakbot - December 18, 2010, 1:32 am

no problem . it's novirusthanks for scannin'

KillYou! - December 18, 2010, 3:10 am

Thanks mate, I will try it ou for my server ;)

Dx3xCreet - December 18, 2010, 3:15 am

what about the output file your shit2 where to get it explain a little bit better

Breakbot - December 18, 2010, 4:55 am

if you don't get what is the output file means that you are very dumb , sorry to say that .

you browse the file first , then the output file means the new server that you are going to save

Dumbo - December 18, 2010, 10:02 am

thanks for the good tuts bro , never this before .

Marciej123 - December 18, 2010, 3:06 pm

im gonna try this out, This looks kinda cool :)

AUTISMUS MAXIMUS - December 21, 2010, 9:12 am

lol from 8 detections to 6 detections :)

maybe im doing something wrong?

Ctrl Alt Defeat - December 21, 2010, 10:11 am

Great tutorial :) going to try it out later.

Thanks alot for this!

vandalf3 - December 22, 2010, 9:59 pm

breakbot could you give me the serial cuz when my victim run my rat they got a thing when they try to open so it say it crypted with molebox and shit and they can click yes or no so can you post the serial here?

misteramomo - December 23, 2010, 3:24 am

Thanks for this nice tuto man => i gonna try this

tallkotteh - December 24, 2010, 2:15 pm

weow i got my file completely FUD with this! great tut bookmarked! thx =P

eXtazie - December 24, 2010, 4:33 pm

Really work? Too good to be true I think

iPWN1337 - December 24, 2010, 5:54 pm

i dont get the output, do we make a new server or what? this destroyed my server

Breakbot - December 25, 2010, 4:41 am

it create a protected one . for fuck sakes why don't you get what does output file means

mouom - December 27, 2010, 3:05 pm

This TuT is fucking awesome, it'll help a lot of people here :)

naveedch2006 - December 27, 2010, 3:46 pm

thanks but will it work for turkojan?

the_lol - December 28, 2010, 12:06 am

Images does not work. :\

tnext - December 28, 2010, 3:37 am

thanks!

just tested with a cybergate server.. went from 14/16 to 4/16
good enough for now :D

Breakbot - December 28, 2010, 2:59 pm

glad you like it :)

Younes .0

Boing - December 31, 2010, 10:38 am

Hey Casarat, can we crypt using all the programs in your tutorials (also Part 1, Part 2 ecc) so we get a FULLY FUD server?

Thanks

Breakbot - December 31, 2010, 2:43 pm

yeah why not . someone already pm'd me saying that he did make it FUD using all of the methods i've made

Simonas00 - January 1, 2011, 4:46 am

Thanks bro, when i reach the 200 posts i will contact you for the cracked version ok? Love your contribution. Thanks in advance. ahh, didn't saw you dont have it anymore ;(. Oh well.

limb3r - January 10, 2011, 10:55 pm

really nice work,
i havent tried it yet but i will with all the raves

TMH - January 10, 2011, 11:19 pm

Wanted to try this out, but your images don't seem to be working on both chrome and firefox for me. I'll take a look at your other two tut's though

Joey Tribbiani - January 11, 2011, 12:38 am

i don't see the images dude :(

nextgenerationhacker - January 11, 2011, 1:33 am

seems good...i am gonna test this out now...

cheers

Virtouozos - January 11, 2011, 2:00 am

(Aug 25, 2010 02:51 PM)Breakbot Wrote: [\[CITE\]](#) sorry dude , i don't post dowload links anymore .
it's very easy to find .
ye WITH SEARCH YOU CAN FIND EVERYTHING YOU WANT

Tovnys - January 20, 2011, 12:43 pm

Will try this later. Good tutorial. Thanks.

bornwild - January 20, 2011, 12:59 pm

BIG Thanks, going to try ...

millionstylo - January 20, 2011, 1:31 pm

nice its clean but cant run it caus of the trial i think

tupsyy - February 22, 2011, 8:51 am

So after I packed my server with molebox, it became FUD, but when i tried to send it to others, and the guy tried to open it, it said server.exe was packed with molebox free trial, and it can be used only by the packer pc. So yea, its fucked. Does any1 know any alternative of Molebox, because this method seems to be good.

Kind regards!

D@rKL0rd - March 2, 2011, 6:37 am

i think mole box u used seems old one..the new version has some slight different features..
Also.....asprotect...can we use it here?

uglykidjoes - March 2, 2011, 8:53 am

Thanks for the sharing nice tut

taokrk - April 25, 2011, 11:03 am

so great thread..but is easier to use public crypter,isnt? :D

Breakbot - April 25, 2011, 4:59 pm

it is , but this will keep your malware ud longer than a public crypter

Mishka - April 25, 2011, 6:05 pm

this is useless. i cant even find a cracked version of Molebox :(

Jeimuzu - April 25, 2011, 6:10 pm

This is great! Could you also make it FUD by using a public crypter and this method instead of just UD?

Mishka - April 25, 2011, 6:52 pm

Is there any other program we can use instead of Molebox?

coreyehs - February 7, 2013, 2:20 am

Great tutorial, thank you for posting, def gonna use this

asoupspoon - March 5, 2013, 7:30 pm

molebox config has changed alot.. does anyone know how to do it with it being updated?

EDIT: i did it but i came up with 14/37 still would like to know what to do with molebox

Mycro_Temp - March 5, 2013, 8:12 pm

I've never even heard of this method but it is worth a shot though.

poker_ass - March 6, 2013, 2:38 am

its really cool man ... i will try it

--Alexander-- - March 6, 2013, 5:25 am

nice tut dude

thanks for sharing it

--

poker_ass - March 7, 2013, 2:01 am

it works....9/35.it's not bad though

Jimmehv - March 17, 2013, 1:30 am

<http://www.datafilehost.com/download-24e3889a.html>

Here is a fully working and clean molebox for the people interested. Also comes with the crack and is easy to use.

The only problem I'm having with this is when Ive packed my server as shown in the tut, it can only be ran on 32-bit OS :/ did i do something wrong or is that how it has to be?

logannn - April 13, 2013, 1:06 pm

The file called 'shit.exe' is that your rat?

Also nice tut. =]

soysauce - *October 20, 2013, 3:15 pm*

This looks a lot more promising than all the other public crypters I've tried so far. Thanks for sharing.

Owl--- - *October 20, 2013, 6:39 pm*

thats nicely done thanks for sharing

onlineman - *October 21, 2013, 4:01 am*

is it also run time FUD not only scan time ?
