Thread: [\[vb.net\]FILE SHREDDER + WINDOWS EXPLORER \[VB.NET SRC\]](#)

Modesty - August 26, 2010, 8:42 am

Got extremely bored when half of today i had no internet (AGAIN), so i came up with this. If you want to get rid of some data that you don't want to be accessed again you can use this.

When you delete a file, it can always be recoverd. But when you delete with this tool, it corrupts the file first, then deletes so that if recovered, it will be a load of gibberish.

Also acts as a sexy file explorer + sauce source included.

pic:

[img]<http://www.pixelfrag.com/release/files shredder.png>[/img]

vid: <http://www.pixelfrag.com/release/shredder/forblog.html>

dl link: www.pixelfrag.com/release/corruption.zip

use and abuse ?

and no this isnt built on nathan's file explorer.

d3c0mpil3r - August 26, 2010, 9:22 am

Looks interesting!

Would love to see the source :)!

Thank you!

jinrahul - August 26, 2010, 9:25 am

maybe some coding error..

beter if you paste code of deleting the file which u written :)

Modesty - August 26, 2010, 9:33 am

coding error? wtf lol. There seems no "coding error", otherwise it wouldnt have compiled.

and what the fuck, 1.6k views and 3 replies? must be a bug xD

d3c0mpil3r - August 26, 2010, 9:37 am

yeaH ! over 1.6k views !! lolx

Now I too will check the code ! ?

Modesty - August 26, 2010, 9:37 am

i posted this like 30 minutes ago lol....:/

DarkSeven46 - August 26, 2010, 9:39 am

Dam, this is sexy. Thanks alot.

Modesty - August 26, 2010, 9:43 am

(Aug 26, 2010 09:39 AM)DarkSeven46 Wrote: [\[CITE\]](#) Dam, this is sexy. Thanks alot.
np :3 xD i like the aero, tried to copy some basics of the windows 7 shell.

Entrepreneur - August 26, 2010, 9:44 am

This looks great, i could find a great use for this.

jinrahul - August 26, 2010, 10:00 am

not mean that,
can you paste your code here for beter understand?

Modesty - August 26, 2010, 10:10 am

(Aug 26, 2010 10:00 AM)jinrahul Wrote: [\[CITE\]](#) not mean that,

just download the whole project and see?

what part of the code do you need?

H4?0R - August 26, 2010, 10:35 am

Nice it looks sexy. I'll take a look
thanks for sharing "P Y R O", keep it up ;)

The Weeknd. - August 26, 2010, 10:56 am

Nice, i'll study the source XD

`P R O D I G Y™ - August 26, 2010, 11:00 am

Ooo, so we just fuck the files up before deleting them?

Modesty - August 26, 2010, 11:08 am

(Aug 26, 2010 11:00 AM)`P R O D I G Y™ Wrote: [\[CITE\]](#) Ooo, so we just fuck the files up before deleting them?
pretty much :) though make sure u fuckup and delete all backups and temps of that file aswell to ensure 100% no recovery :)

`P R O D I G Y™ - August 26, 2010, 11:13 am

Well aren't you just a .NET guru :) Good work

Rue - August 26, 2010, 11:15 am

This doesn't even work correctly. You should overwrite the whole file with random bytes, not just the first part of it... Don't be lazy and use the WriteAllText or WriteAllBytes functions either. Loop through every byte in the file and replace it with a random one between 0x00 and 0xFF, do this 7 times then delete it.

`P R O D I G Y™ - August 26, 2010, 11:17 am

How will that be any different than just corrupting it?

Snorlax - August 26, 2010, 11:17 am

(Aug 26, 2010 09:44 AM)Monetizing Kid Wrote: [\[CITE\]](#) This looks great, i could find a great use for this.

Me to, I'm sure there are also alot of 40 year old men enjoying this program also :) ?

You need .NET Framework 4.0, which I hate so much. The GUI is gross and I feel like it's VERY laggy when trying to move things around...just in general I think the programs really slow/laggy compared to Visual Basic 2008.

xSilent - August 26, 2010, 1:23 pm

Thank you, I thought I was the only one who thought that.

@OP nice on the file corrupter.

Modesty - August 26, 2010, 1:31 pm

i found it much better actually. Love .net 4, you can always set the target framework to 2 for others to run your program and i havnt noticed any difference. running x64 windows 7 with 6 gig ddr3 ram if it makes any difference.

but it was fine on my x86 laptop with windows 7 and 3 gigs ram

KingCobraXD - August 27, 2010, 5:15 am

hmm.. gonna see if there's a way to un corrupt this thing..

Kotei - August 27, 2010, 1:18 pm

I love you....Part of this source helped me so fucking much...

I feel like an idiot for not thinking of it though..

Modesty - September 25, 2010, 12:44 pm

Lol np bro <3

Helpful if you want to make a file explorer too.

newbie223 - September 25, 2010, 1:00 pm

if you dun 1 sumthing to be recovered empty ur recycle bin xD

Modesty - September 25, 2010, 1:02 pm

(Sep 25, 2010 01:00 PM)newbie223 Wrote: [\[CITE\]](#) if you dun 1 sumthing to be recovered empty ur recycle bin xD

Incorrect. Lol. Thats why you have software called "GetBackData" which allows you to recover files, even if you delete out of recycle bin. This way, even if data is recoverd, it will be corrupted, and useless. Therefore this is a pretty safe way of deleting sensitive data.

newbie223 - September 25, 2010, 1:23 pm

i taught theres like a timeframe for the getbackdata....

but if people out there is really paranoid why not do this

take the content of the file encrypt it with tripledex or wtv encryption they can think of and put it back into the file this way no1 can acces it even if it was not deleted :)

Modesty - September 25, 2010, 1:24 pm

(Sep 25, 2010 01:23 PM)newbie223 Wrote: [\[CITE\]](#) i taught theres like a timeframe for the getbackdata....

Why encrypt, when you can just remove all the shit from the file and corrupt it :p

newbie223 - September 25, 2010, 1:25 pm

exactly encrypt with a undecryptable cryption like md5 i dunno im just spitballing here

Modesty - September 25, 2010, 1:26 pm

(Sep 25, 2010 01:25 PM)newbie223 Wrote: [\[CITE\]](#) exactly encrypt with a undecryptable cryption like

Lol, but that will also keep the original filesize. This corrupts it to like a 50 byte file, and deletes it.

The_KGB - September 25, 2010, 1:28 pm

<http://www.edrsolutions.com/>

Watch the video...

Spoiler ([Click to View](#))

Recover that data.

Modesty - September 25, 2010, 1:31 pm

I need one of those.

??

newbie223 - September 25, 2010, 1:35 pm

erm nope if u encrypt the file content with md5 i think ur file size will be 10-20kb i made this kind of program b4

Modesty - September 25, 2010, 1:41 pm

(Sep 25, 2010 01:35 PM)newbie223 Wrote: [\[CITE\]](#) erm nope if u encrypt the file content with md5 i think ur file size will be 10-20kb i made this kind of program b4

10-20kb = 10240 / 20480 bytes, unlike mine which is around 50bytes. Heck i can make it 1byte. The one in thios thread makes it 100bytes.

And md5 isn't encryption is it? It's more of a hash.

newbie223 - September 25, 2010, 1:49 pm

yea md5 is hash

ca hf get rid of short msg reli annoying

PlatinumHex - September 25, 2010, 10:14 pm

Waahhh!!! The explorer thingy looks sick!

Coder - September 25, 2010, 10:37 pm

Man, I hate you. I was working on my explorer from a few months. :(

Zer[o] - September 25, 2010, 10:39 pm

wow this is awesome. nice share

Crazychaos - September 25, 2010, 11:53 pm

I like it wouldnt find any use of it but again i like it

Oxycodone - September 26, 2010, 1:27 am

Does it just open the file in steamwriter and corrupt it then io.delete or w.e?

RBH - September 26, 2010, 1:34 am

Pretty badass man, will check this out for sure!

BTW Thanks for the source!

Galaxy Wave - September 26, 2010, 2:05 am

Damn this the shit thanks bro

Milopeach - September 26, 2010, 2:10 am

You are amazing!!! This is pretty sexy as well.

rapidguide - September 26, 2010, 8:16 am

Its Looks Great

Nice

Keep It Up

Joler1302 - September 26, 2010, 8:37 am

10K Views.. O_o that alot fucking lot...

BADG3R x - October 5, 2010, 4:35 am

Great source,Thanks

Add a help button for the retards though

Modesty - October 11, 2010, 2:53 pm

10k views, lmao wow.

Just like holy shit, is this a bug

50GTB - October 11, 2010, 2:55 pm

Got extremely bored when half of today i had no internet (AGAIN), so i came up with this. humm you showed me that a few days ago xD nice will download mate

marvinn - January 8, 2011, 9:07 am

Nice share! Thanks so mutch i was looking for it <3

GREAT CODER!

Mr nathan... the other user replied to 3 year old thread that links are broken so i just told him/her that the thread is 3 years old... but i think you doesn't like non uber's telling same thing which various other uber member tells when reply to old threads are posted... I was not aware that you give negative reputation for simple replies... ;)

Regards
