Thread: [md5\(\\$salt.\\$pass\) ->>>>>>>>>>](#)

lordtequila - August 27, 2010, 11:00 am

```
md5($salt.$pass)=5a042913e5074bc846784dd2066456d2:26
```

pls can some one help me with this hash ! If u do pls tell me what method or tool used. thanks

TheTramid - August 27, 2010, 1:15 pm

The password begins with the number '26' (= the salt). And it's encrypted with MD5.

26frnman5 this is wat i got from the md5. but doesn't work... anyother bright ideas? thanks again
what a silly finger can doi messed up <http://www.e-nigeria.net/> just cos i looked away for a
second and i hit DEL template instead of save..lol! Any ideas how i can restore the template and put
up the deface i wanted to put?

TheTramid - August 27, 2010, 1:40 pm

That's the password, there are no other ways or "possibilities".

Baller™ - August 27, 2010, 2:01 pm

if you don't know the salt use hashcat

you can crack vbulletin , ipb phpbb forums hashes
